Dear Sir or Madam,

I am writing on behalf of the Microgrid Resources Coalition (MRC), a not-for-profit advocacy group comprised of industry members who are interested in creating a more level playing field for deployment of microgrids.

Unfortunately, we only learned of this docket on Nov 15 and with a submittal deadline of 20 November, 2017, we are unable to develop full comments in reply to the questions posed therein. In the interest of providing some information that may be useful to the Puerto Rico Energy Commission, we offer links to the following recommendations on policies and regulations for microgrids that MRC has filed in other states that may be relevant to you:

- [MRC Comments on Draft Roadmap to Commercializing Microgrids in CA, November 13, 2017](#)
- [MRC Comments on NARUC Draft DER Manual, September 2, 2016](#)
- [MRC Comments on NY's Order Adopting Regulatory Policy Framework and Implementation Plan, May 1, 2015](#)

Further, we would suggest you consider visiting our website - <https://www.districtenergy.org/microgrids/home> and in particular the page related to [Advocacy and Regulatory Policy](#) for additional information.

Please keep us in mind as your process moves forward. Members of the MRC may be available to provide additional consulting and regulatory support in the months ahead.

Respectfully submitted,

Rob

Robert P. Thornton
