PUERTO RICO ENERGY BUREAU

IN RE: REVIEW OF THE PUERTO
RICO ELECTRIC POWER
AUTHORITY INTEGRATED
RESOURCE PLAN

CASE NO.: CEPR-AP-2018-0001

SUBJECT: PREPA's Motion for
Confidential Treatment of Portions of
Its Responses to ROIs

2019 AUG -2 PM 3:24

JRSP - SECRETARIA
NEGOCIADO DE ENERGIA
DE PUERTO RICO

**PREPA'S MOTION FOR CONFIDENTIAL TREATMENT
OF PORTIONS OF ITS RESPONSES TO ROIs**

TO THE HONORABLE PUERTO RICO ENERGY BUREAU:

COMES NOW the Puerto Rico Electric Power Authority ("PREPA") and respectfully submits to the honorable Puerto Rico Energy Bureau (the "Energy Bureau")¹ PREPA's Motion for Confidential Treatment of Portions of Its Responses to ROIs. This Motion relates to PREPA's separately filed Cover Filing for Responses to Energy Bureau 1st Set of ROIs and Confidentiality Designations, and Motion for More Time on Certain Items.

I. INTRODUCTION

1. PREPA is submitting this Motion for purposes of certain confidentiality designations specified in Section II of this Motion. PREPA also intends, as this integrated resource plan ("IRP") case proceeds, and as PREPA makes additional confidentiality designations if and as needed, to refer back to and incorporate the legal discussion in Section III of this Motion, so as to avoid repetitive filings.

2. PREPA, pursuant to federal and Puerto Rico law, including but not limited to the federal and Puerto Rico law referenced in Section III of this Motion; the Energy

¹ References herein to the Energy Bureau also include the former Puerto Rico Energy Commission when applicable.

Bureau's Regulation on Adjudicative, Notice of Noncompliance, Rate Review and Investigation Proceedings (Regulation No. 8543), §§ 1.15, 15.10, to the extent applicable; the Energy Bureau's August 31, 2016, Resolution in docket no. CEPR-MI-2016-0009; and the Energy Bureau's July 11, 2019, 1st Requirement of Information ("ROI") to PREPA, Instruction I(B); has designated specific responses or portions of responses to certain ROIs listed in Section II of this Motion as Confidential.

3. In some instances, Confidentiality designations are necessary because the information or document contains Critical Energy Infrastructure Information ("CEII"),² which is protected from public disclosure under federal and Puerto Rico law. CEII is highly sensitive information that needs very careful protection, as has been recognized by the Energy Bureau in many past dockets. When PREPA has been required to produce CEII in the past, the material usually has restricted to possession and review by Commissioners and staff only, although, in some limited circumstances, formal intervenors, upon written agreement to abide by confidentiality protections, have been allowed very carefully controlled opportunities to review some CEII material.

4. In other cases, Confidentiality designations are necessary because the information is a trade secret (confidential financial and other protected information), which is also protected under Puerto Rico law. The confidential information can be, for example, PREPA financial information that should not be made available to PREPA suppliers, in order to avoid the suppliers being able to take unfair advantage of the information in a way that increases PREPA's costs, to the detriment of PREPA and its

² To the extent that any of the Critical Energy Infrastructure Information involved in this IRP case involves the water system rather than the energy system, the same concerns and legal principles apply, although some of the citations in the Memorandum of Law, below, are specific to CEII.

customers; confidential information from a PREPA supplier that should not be made available to competing PREPA suppliers, for similar reasons; or, confidential customer information.

5. For the sake of efficiency, PREPA has included as Section III of this Motion a Memorandum of Law to support its pending and future designations.

II. CONFIDENTIALITY DESIGNATIONS

6. PREPA has made the following confidentiality designations with respect to its responses to the Energy Bureau's July 11th 1st set of ROIs.

- Technical Information - PREB-PREPA-01-06 -- Confidential-PREPA ROI_1_6 Attach 1.docx; Confidential-PREPA ROI_1_6 Attach 2.xlsx
- Technical Information - PREB-PREPA-01-16 -- Confidential-PREPA ROI_1_16 Attach 1.pdf; Confidential-PREPA ROI_1_16 Attach 2.pdf; Confidential-PREPA ROI_1_16 Attach 3.pdf, Confidential-PREPA ROI_1_16 Attach 4.xlsx; Confidential-PREPA ROI_1_16 Attach 5.xlsx; Confidential-PREPA ROI_1_16 Attach 6.xlsx
- Technical Information - PREB-PREPA-01-23 -- Confidential-PREPA ROI_1_23 Attach 4.pdf
- Trade Secret - PREB-PREPA-01-39 -- Confidential-PREPA ROI_1_39 Attach 1.pdf
- Trade Secret - PREB-PREPA-01-56 -- Confidential-PREPA ROI_1_56 Attach 1.xlsx

7. The items designated as Technical Information are Confidential Energy Infrastructure Information (CEII).

III. MEMORANDUM OF LAW

8. Federal and Puerto Rico law and Energy Bureau orders contain multiple provisions and recognitions of CEII and other grounds for confidentiality designations. PREPA has made the Confidentiality designations in Section II of this Motion based on its careful assessment of the contents of the materials.

A. Critical Energy Infrastructure Information

9. Federal law and Puerto Rico law protect the confidentiality of CEII, the public disclosure of which may pose a security threat in that the information could be useful to a person or group in planning an attack on critical infrastructure. See, e.g., 18 C.F.R. § 388.113, as amended by Federal Energy Regulatory Commission ("FERC") Order No. 683, "Critical Energy Infrastructure Information" (issued September 21, 2006); "USA Patriot Act of 2001", § 1016, creating the "Critical Infrastructures Protection Act of 2001", including 42 U.S.C. § 5195c(e) (defining "Critical infrastructure").

10. Under the Critical Infrastructures Protection Act of 2001, the term "critical infrastructure" means "systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of such systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters." 42 U.S.C. § 5195c(e).

11. In 2006, FERC Order No. 683 amended the regulations for gaining access to CEII and simplified procedures for obtaining access to CEII without increasing vulnerability of the energy infrastructure and ensuring that access to CEII does not facilitate acts of terrorism.

12. A utility is not required to obtain FERC or other federal government approval in order to designate information as CEII. For example, information required

by FERC's Annual Transmission Planning and Evaluation Report, Form No. 715, ("FERC No. 715"), is *de facto* considered CEII and is automatically afforded the heightened protections. FERC No. 715 requires that any transmitting utility that operates integrated (non-radial) transmission facilities at or above 100 kV must annually submit information including but not limited to: Power Flow Base Cases, Transmitting Utility Maps and Diagrams, Transmission Planning Reliability Criteria, Transmission Planning Assessment Practices, and Evaluation of Transmission System Performance. Any utility that submits the required transmission information pursuant to FERC No. 715 does so with the knowledge that, as stated in the Form's Instructions, FERC "considers the information collected by this report to be Critical Energy Infrastructure Information (CEII) and will treat it as such." See *also* 18 C.F.R. § 141.300(d) relating to the Form and CEII.

13. PREPA further states that mainland regulators typically do not require a utility that designates material as CEII to follow any process before the federal government in order to make or support such a designation, and, further, that the regulator, in its informed discretion, can establish limits on how information that it considers CEII can be accessed.

14. The Energy Bureau, on numerous occasions in prior dockets and the instant docket has accepted PREPA's designations of material as CEII, recognizing that both federal law and Puerto Rico law support such designations when applicable.

B. Trade Secrets

15. Puerto Rico law also protects trade secrets, including information that has the potential for financial or commercial value. The principal law protecting the confidentiality of trade secrets, codified in Act 80-2011, is the "Industrial and Trade

Secret Protection Act of Puerto Rico.” Act 80-2011 defines a trade secret as any information that:

has a present or a potential independent financial value or that provides a business advantage, insofar as such information is not common knowledge or readily accessible through proper means by persons who could make a monetary profit from the use or disclosure of such information; and [f]or which reasonable security measures have been taken, as circumstances dictate, to maintain its confidentiality.

Trade secrets may take a variety of forms, including “a process to manufacture, treat or preserve materials, a formula or recipe, a project or pattern to develop machinery, or simply a list of specialized clients that constitute a specific market which provides the owner with an advantage over his/her competitors.” However, these examples are not exhaustive, and the Legislative Assembly reinforced in the Statement of Motives of Act 80-2011 that the broad definition of a trade secret includes “any confidential information with trade or industrial value, which its owner reasonably protects to prevent its disclosure.” In Puerto Rico, moreover, trade secrets “do not require registration or compliance with any formalities in order to be protected.” The Legislative Assembly further noted that “failure to protect trade secrets could leave companies at the mercy of any competitor or former employee who gains knowledge of any such secret, whether directly from the owner or by other means.”

16. As a public body whose costs are ultimately borne by citizens of Puerto Rico, PREPA also has a strong interest in protecting its own trade secrets and also the trade secrets of actual and prospective vendors and contractors who entrust PREPA with that information in confidence as part of business and financial dealings. Violating those protections as to PREPA’s own trade secrets could allow suppliers to take unfair

advantage of PREPA. Violating those protections as to confidential supplier information could not only harm those other parties, but also threaten PREPA's ability to acquire goods and services from the markets at the lowest cost, again ultimately harming customers.

17. PREPA also has a valid interest in protecting confidential information of and regarding its customers. Such information falls within Act 80-2011's definition of trade secrets, in light of the inherent value in maintaining the trust and confidence of customers. PREPA believes its customers expect that PREPA will maintain this information in a confidential manner, and PREPA has a strong interest in protecting its relationships with customers by upholding their expectation of privacy. If PREPA were to compromise its relationships with its customers by publishing information that customers reasonably expected would be confidential, PREPA could lose its customers' business. Any loss of business would adversely impact PREPA's ability to operate, and its existing and future ratepayers.

WHEREFORE, the Puerto Rico Electric Power Authority respectfully requests that the Honorable Puerto Rico Energy Bureau accept the Confidentiality designations listed above.

RESPECTFULLY SUBMITTED,

IN SAN JUAN, PUERTO RICO, THIS 2nd DAY OF AUGUST, 2019

PUERTO RICO ELECTRIC POWER AUTHORITY

I hereby certify that on August 2, 2019, I have filed the above Motion with the Puerto Rico Energy Commission in hard copy format at the office of the Clerk of the Puerto Rico Energy Bureau, and that courtesy copies were sent via email to the Puerto Rico Energy Bureau staff via email to secretaria@energia.pr.gov; viacaron@energia.pr.gov; and legal@energia.pr.gov. In addition, copies of the Motion were sent via email to approved intervenors and that notified PREPA with their email address.
