* CASE NO: NEPR-MI-2019-0008
*
* SUBJECT: Data available to
* clients in website pursuant to
* Statutory requirements
*

MOTION IN COMPLIANCE WITH RESOLUTION AND ORDER

On May 20, 2019 the Energy Bureau of the Puerto Rico Public Service Regulatory Board (Energy Bureau) issued a Resolution and Order giving the Puerto Rico Electric Power Authority (PREPA) twenty (20) days to demonstrate compliance with the following requirements:

- i. A platform to pay bills, examine the consumption history, verify the usage pattern, and obtain information related to their bill, such as the reading of the meter at the beginning and at the end of the billing cycle, dates and number of days in the billing cycle, and meter constant, the rates, the date of the next reading, as well as any other information that enables the verification of the reading;
- ii. Information of the electric power infrastructure, including information regarding public and private generators, so that customers may be able to evaluate the status of the electric power infrastructure and PREPA as a public instrumentality;
- iii. A copy of all the contracts and resolutions of PREPA's Governing Board;
- iv. Any document related to the revenues, sales, expenses, disbursements, assets, liabilities, accounts receivables, and any other PREPA financial information;
- v. The price per barrel, or its equivalent, per type of fuel, the average rate per kilowatt-hour for each customer sector, the cost of generation per kilowatt-hour and per power plant, all operating costs and expenses, an itemization of the operating costs related to electric power generation, transmission, and distribution, the service cost to each customer class, generation per type of technology, and any other information about PREPA operations;
- vi. A breakdown of the electricity demand projected and determined by PREPA's Energy Control Center;
- vii. The data related to the energy generation capacity and reserve margins;

- viii. The status of the internal procedures PREPA has to develop in order to implement the changes required by means of legislation to reform Puerto Rico's electrical system;
- ix. Access to a platform where customers may request any information and other PREPA public documents that are not available through the website;
- x. A copy of the agreement or agreements entered with the bondholders, by virtue of PROMESA; and
- xi. The monthly financial reports that should be published on the website on or before thirty (30) days after the month covered in the report concludes.

The information described in items v, vi and vii shall be posted in real-time.

In compliance with the above mention requirements, PREPA provides the following information:

- 1. The information requested in item i is available in PREPA's Web site through the Mi Cuenta link. The client only needs to register in Mi Cuenta to have access to its information. Attached is a copy of the page.
- 2. The information requested in item ii is available in PREPA's website, through the following link: <https://aeepr.com/es-pr/quiénes-somos/ley-17>.
- 3. The information requested in item iii is available in PREPA's website. The resolutions of the Governing Board are available in its portal, under the following link: <https://aeepr.com/es-pr/quiénes-somos/portal-junta-de-gobierno/resoluciones>. Attached is a copy of the list of document documents available in PREPA's website.

The contracts are available under the following: https://aeepr.com/es-pr/QuienesSomos/Paginas/contratos/Contratos_Generales.aspx. Attached is a copy of the list of documents available in PREPA's website.

- 4. The information requested in item iv is available in PREPA's website, in the investors and financial community portal, under the following link: <https://aeepr.com/es-pr/investors/Paginas/Financial-Information.aspx>. Attached is a copy of the list of documents available in PREPA's website.
- 5. The information requested in items v, vi and vii is not available in PREPA's website. The information is requested in real time and PREPA contracted two companies: LT Automation Inc. and Invid, LLC, to make the necessary changes in PREPA's website. Also, PREPA is procuring the technological modules to make the information

available not just in the website, but also, in mobile and desktop platforms. The work is in progress, nevertheless, PREPA needs at least thirty additional days to complete the changes to the webpage and to run the tests necessary when giving access to data in real time.

6. The information requested in item viii is part of the work in progress. We began the review of the regulations regarding the interconnection of Distributed Generation Systems (GD), and we are identifying all those regulations and procedures that we will need to amend during the transformation process. Nevertheless, we need to wait until the concessionaire, and all other transactions are in a more advanced stage, to evaluate the real impact on PREPA's operations, procedures and documents.
7. The information requested in item ix is available in PREPA's website, in the following link: <https://aeepr.com/es-pr/contactanos/correo-electronico>. Attached is a copy of the page.
8. The information requested in item x is available in PREPA's website. The recently approved Restructuring Support Agreement is available in PREPA's website, in the following link: <https://aeepr.com/es-pr/quienes-somos/ley-17>.
9. The information requested in item xi is available in PREPA's website in the investors and financial community portal, under the following link: <https://aeepr.com/es-pr/investors/Paginas/Financial-Information.aspx> Attached is a copy of the list of documents available in PREPA's website.

We respectfully request from the Energy Bureau, to deem the May 20, 2019 Resolution and Order complied with and to grant PREPA an additional thirty (30) day term to complete the IT efforts to have available in the website and other platforms, the information requested in items v, vi, and vii.

Respectfully submitted, in San Juan, Puerto Rico on June 10, 2019.
