IN RE: REVIEW OF THE PUERTO RICO ELECTRIC POWER AUTHORITY INTEGRATED RESOURCE PLAN

CASE NO.: CEPR-AP-2018-0001

SUBJECT: PREPA’s Request for Confidential Treatment for Exhibits Attached to the Production of Documents in Response to Information Request Made During IRP Evidentiary Hearings

RESOLUTION

On March 12, 2020, the Puerto Rico Electric Power Authority ("PREPA") filed before the Energy Bureau of the Puerto Rico Public Service Regulatory Board ("Energy Bureau") a document titled Memorandum of Law Requesting Confidential Treatment for Exhibits Attached to the Production of Documents in Response to Information Requests Made During IRP Evidentiary Hearings. As part of its filing, PREPA requested confidential treatment of the attachments to the Production of Documents in Response to Information Requests Made During IRP Evidentiary Hearings ("March 12 Motion"). Through the March 12 Motion, PREPA included several exhibits, one that was submitted under seal and other that was submitted in a redacted version. PREPA states that the Exhibit A\(^1\) of the March 12 Motion contains trade secret and performance curves of the diesel units that, if disclosed, could place PREPA in a competitively disadvantageous position in dealing with potential proponents. On the other hand, PREPA alleges that Exhibit B\(^2\) describes specific damaged infrastructure that may need to be repaired, restored or replaced. As stated above, the reports contained in Exhibit B have been submitted in redacted version, protecting information proprietary of PREPA.

Act No. 57-2014\(^3\) establishes that any person having the obligation to submit information to the Energy Bureau, can request privilege or confidential treatment to any information that the party submitting understands deserves such protection.\(^4\) Specifically, Act 57-2014 requires the Energy Bureau to confidentially treat the submitted information provided that "the Energy Bureau, after the appropriate evaluation, believes such information should be protected".\(^5\) In such case, the Energy Bureau "shall grant such protection in a manner that least affects the public interest, transparency, and the rights of
