RESOLUTION

On July 2, 2021, the Energy Bureau of the Puerto Rico Public Service Regulatory Board ("Energy Bureau") issued a Resolution and Order in the instant case ("July 2 Resolution"). Through the July 2 Resolution, the Energy Bureau restated the procedural calendar established in the June 4, 2021 Resolution and Order.

On July 13, 2021, the Energy Bureau issued a Resolution Nunc Pro Tunc ("July 13 Resolution"), through which it stated that the procedural calendar in the July 2 Resolution included a typographical error related to the scheduled date for the Virtual Public Hearings. The Energy Bureau issued a revised calendar clarifying the error.

On July 22, 2021, LUMA Energy, LLC and LUMA Energy ServCo, LLC (collectively, "LUMA") filed before the Energy Bureau a document titled Request to Amend Procedural Calendar to Allow Discovery on Intervenor Testimonies and Filing of Rebuttal Testimonies ("Motion"). Through its Motion, LUMA requests the Energy Bureau to clarify the due date for LUMA to submit pre-filed testimonies of LUMA’s witnesses. Also, LUMA requests the Energy Bureau to amend the procedural calendar to: (i) allow LUMA to conduct discovery on the written testimonies to be filed by intervenors; and (ii) authorize LUMA to file rebuttal written testimony.

LUMA states that, based on the current procedural calendar, it does not have the opportunity to conduct discovery on the testimonies to be filed by intervenors. LUMA argues that, without an opportunity to conduct discovery on intervenor’s testimonies, whereby intervenors will inform their positions, opinions, and recommendations, its ability to present and defend its position supporting its revised request would be materially limited. LUMA further alleges that it would be in a procedural disadvantage since its ability

to conduct cross-examination would be limited as LUMA would not have the opportunity to inquire about the basis of intervenor’s testimonies.\(^3\)

LUMA also requests the Energy Bureau to authorize the submission of rebuttal testimonies by LUMA. LUMA states this will benefit the proceedings since all parties would have equal opportunity to file evidence and testimonies regarding the complete set of evidence to be presented.\(^4\)

On August 6, 2021, LUMA filed before the Energy Bureau a document titled *Urgent Request to Reschedule the August 11th Deadline* ("Urgent Request"). Through its Urgent Request, LUMA states that the development of a revised request has required time-intensive analysis additional to the efforts LUMA had been undertaking in prior months.\(^5\) LUMA states that this analysis has required corroboration of the proposed targets to ensure that the revised filing to be submitted is complete and accurate considering the limitations on data, data collection processes and the current state of the utility.\(^6\) LUMA argues that upon commencement of operations it has encountered additional challenges regarding data collection relevant to the analysis to file a revised request.\(^7\)

Additionally, LUMA alleges that additional time is needed based in the considerable number of witnesses it has identified so far that shall submit pre-filed testimonies.\(^8\) LUMA argues that preparing and filing written testimonies requires substantial work by LUMA in consultation with different operational components. LUMA also alleges that its participation in several dockets before the Energy Bureau not only demands substantial care and attention from LUMA but provides an important context on the reasons why it is reasonable to grant LUMA additional time to comply with the August 11\(^{th}\) deadline.\(^9\) Therefore, LUMA requests the Energy Bureau to grant an extension of seven additional business days to submit its Revised Request.

The Energy Bureau issued the original procedural calendar in the instant case through the April 8, 2021 Resolution and Order.\(^10\) The Energy Bureau established that, as

part of LUMA’s Revised Request, as defined in the procedural calendar, LUMA shall also include LUMA’s witnesses Pre-Filed Testimony, which shall address all aspects of LUMA’s petition. Even though the Energy Bureau has amended the procedural calendar on several occasions, the Energy Bureau has not amended LUMA’s Pre-Filed Testimony requirement. Therefore, the Energy Bureau CLARIFIES that LUMA shall include its witnesses Pre-Filed Testimony as part of LUMA’s Revised Request.

Moreover, upon review of LUMA’s arguments supporting its Motion, the Energy Bureau DETERMINES that it is prudent to include as part of the procedural calendar the opportunity to (i) conduct discovery on written testimony filed by intervenors and (ii) file rebuttal testimony to any intervenor pre-filed testimony.

However, upon review of LUMA’s arguments, the Energy Bureau PARTIALLY GRANTS the Urgent Request. The Energy Bureau is aware of recent events that may have disrupted LUMA’s personnel in preparing the required filing under this case. Notwithstanding the foregoing, the Energy Bureau has emphasized in numerous occasions the importance of timely compliance with the Energy Bureau’s orders.

Based on the above, the Energy Bureau AMENDS the procedural calendar for the instant case as follows:
