

**GOVERNMENT OF PUERTO RICO
PUERTO RICO PUBLIC SERVICE REGULATORY BOARD
PUERTO RICO ENERGY BUREAU**

NEPR Received: Jun 30, 2022 10:43 PM

IN RE: REVIEW OF LUMA’S TERMS OF SERVICE (LIABILITY WAIVER)

CASE NO. NEPR-MI-2021-0007

SUBJECT: Submission in Compliance with Final Resolution and Order and Request for Confidential Treatment

MOTION IN COMPLIANCE WITH FINAL RESOLUTION AND ORDER AND REQUEST FOR CONFIDENTIAL TREATMENT

TO THE HONORABLE PUERTO RICO ENERGY BUREAU:

COME now **LUMA Energy, LLC** (“ManagementCo”), and **LUMA Energy ServCo, LLC** (“ServCo”), (jointly referred to as the “Operator” or “LUMA”), and respectfully state and request the following:

1. On February 24, 2021, LUMA filed a *Petition for Approval of the Initial Budgets and Related Terms of Service* before the Puerto Rico Energy Bureau (“Energy Bureau”). The filing was made pursuant to Section 6.22 of the Puerto Rico Energy Transformation and Relief Act, Act No. 57-2014, as amended; the Final Rate Order entered by the Energy Bureau in Case No. CEPR-AP-2015-0001; and per LUMA’s obligations under Section 4.2(e) of the Puerto Rico Transmission and Distribution System Operation and Maintenance Agreement dated June 22, 2020, by and among the Puerto Rico Electric Power Authority (“PREPA”), and the Puerto Rico Public-Private Partnerships Authority (“P3A”) (hereinafter, the “T&D OMA”).

2. On May 31, 2021, the Energy Bureau issued a Final Resolution and Order identified as the Final Determination on LUMA’s Terms of Service Petition (Liability Waiver), which approved Modified Terms of Service (“May 31st Final Order”). The Modified Terms of Service

were to be incorporated and made part of the Puerto Rico Electric Power Authority Book of Tariffs approved on May 28, 2019. The Modified Terms of Service entered into effect on June 1st, 2021.

3. Upon issuing the May 31st Final Order, the Energy Bureau reasoned that adopting a limited liability waiver responds in some respects to an increased risk of liability for acts that are susceptible to repetition. It held that LUMA presented clear and convincing evidence that a liability waiver was compelling because situations that result in potential damages to customers of the electric system are substantially higher in the case of the Puerto Rico transmission and distribution system (“T&D System”) when compared to other utilities in the U.S. because of the T&D System’s current state. *See*, May 31st Final Order on page 38. As a result, “the T&D System is more prone to suffer outages and service disruptions, among other service issues, than the typical utility in the United States”. *Id.* Thus, there is vulnerability to claims associated with these conditions, which could substantially impact the T&D System’s operational budget. *Id.*

4. As such, the Energy Bureau instructed LUMA in the May 31st Final Order to file not later than June 30, 2022, an updated report describing all pending judicial and extrajudicial claims from customers and/or persons receiving electricity and power from the Puerto Rico Power Authority (“PREPA”), for events arising out of, or which are a result of, the operation and maintenance of the T&D System. The updated report must also include all the amounts disbursed to pay judicial and/or extrajudicial claims from customers and/or persons receiving electricity and power from PREPA for events arising as a result of the operation and maintenance of the T&D System for the period covered between June 1, 2021, and May 31, 2022.

5. In compliance with the May 31st Final Order, LUMA herein submits an Excel spreadsheet including all pending judicial and extrajudicial damages claims known to LUMA for events arising as a result of the operation and maintenance of the T&D System and occurred between June 1, 2021, and May 31, 2022, as *Exhibit 1* to this Motion. The spreadsheet incorporates the claimed amount, a brief description, the claim status, the settlement date, and the amount paid for those cases where a claim has been paid.

6. The bedrock provision on the management of confidential information filed before this Bureau is Section 6.15 of Act 57-2014, known as the “Puerto Rico Energy Transformation and Relief Act.” It provides, in pertinent part, that: “if any person who is required to submit information to the Energy [Bureau] believes that the information to be submitted has any confidentiality privilege, such person may request the Commission to treat such information as such” 22 LPRA §1054n. If the Energy Bureau determines, after appropriate evaluation, that the information should be protected, “it shall grant such protection in a manner that least affects the public interest, transparency, and the rights of the parties involved in the administrative procedure in which the allegedly confidential document is submitted.” *Id.*, Section 6.15 (a).

7. The Energy Bureau’s Policy on Confidential Information details the procedures that a party should follow to request that a document or portion thereof be afforded confidential treatment. In essence, the referenced Policy requires identification of the confidential information and the ... filing of a memorandum of law explaining the legal basis and support for a request to file information confidentially. *See* CEPR-MI-2016-0009, Section A, as amended by the Resolution of September 16, 2016, CEPR-MI-2016-0009. The memorandum should also include

a table that identifies the confidential information, a summary of the legal basis for the confidential designation, and the reasons why each claim or designation conforms to the applicable legal basis of confidentiality. *Id.* paragraphs 3. The party who seeks confidential treatment of information filed with the Bureau must also file both “redacted” or “public version” and an “unredacted” or “confidential” version of the document that contains confidential information. *Id.* paragraph 6.

8. The aforementioned Excel spreadsheet includes the names of those claimants pursuing extrajudicial claims, which is personal information not publicly available, and protected by law and regulation. This information is covered by Sections 8 and 10 of the Puerto Rico Constitution, which protects the right to privacy. Const. P.R., Art. II, Sec. 8 and 10. In our legal system, the protection of the fundamental right to privacy is of such caliber that it is an established rule that operates *ex proprio vigore* between private citizens. *See e.g., Arroyo v. Rattan Specialties, Inc.* 117 DPR 35, 64 (1986) (citing cases). LUMA keeps and maintains this personal information confidential and does not disclose it to the public or unauthorized third parties. Additionally, under Section 13.2 (*Proprietary Information*), subsection (f) (*Customer Information*) of the T&D OMA, LUMA is required to protect from disclosure customer information except as established in said T&D OMA provision and Applicable Law. Therefore, LUMA respectfully requests that the Excel spreadsheet submitted today as *Exhibit 1* to this Motion be received, kept, and maintained confidentially by this Energy Bureau. A redacted public version is submitted herein.

9. Further, pursuant to the May 31st Final Order, the Energy Bureau also directed LUMA to develop and implement a customer outreach program to educate customers about reasonable measures they may implement to protect their person and property from unexpected

and inevitable interruptions to the electricity supply. LUMA was also ordered to submit a summary of the customer's outreach program to the Energy Bureau and a progress report about its implementation on or before June 30, 2022.

10. In compliance with the May 31st Final Order, LUMA submits herein that since June 2021, it has developed and launched its communication campaign directed to customers to protect their personal equipment and be conscious of safety. This initiative consists of a multi-channel public communications campaign aimed to educating and informing our customers on voltage fluctuation issues and the steps they can take to protect their electronic devices, appliances, and equipment in their homes or businesses. This effort includes but is not limited to social media posts and information available on our website, lumapr.com.

11. The surge protection campaign aims to educate customers on power fluctuations, how they can affect electronics, appliances, and equipment, and what customers can do to avoid damage by using voltage surge protectors. Across the website, information on "Protecting your personal Equipment" can be found under the Residential Service options as Helpful Customer Resources: <https://lumapr.com/protecting-your-personal-equipment/?lang=en>. Additionally, under the "frequently asked questions" section, LUMA provides household and electronic appliance protection tips and encourages customers to report outages, voltage fluctuations, or brownouts. See LUMA's website: <https://lumapr.com/faq/?lang=en> See the examples on the customer communication campaign included as *Exhibit 2* to this Motion. Campaign information is available to customers in Spanish and English, depending on their preference.

WHEREFORE, LUMA respectfully requests that the Energy Bureau **take notice** of the aforementioned, **accept** the documents included as Exhibits 1-2 to this Motion, **deem** LUMA complied with the Final Resolution and Order of May 31, 2021, and **grant** the request to keep confidentially the spreadsheet that has been filed in Excel format submitted with this Motion.

RESPECTFULLY SUBMITTED.

We hereby certify that I filed this Motion using the electronic filing system of this Energy Bureau. We will send an electronic copy of this Motion to counsel for PREPA Katiuska Bolaños-Lugo, kbolanos@diazvaz.law, and to the Independent Consumer Protection Office, through Director Hannia Rivera, hrivera@oipc.pr.com.

In San Juan, Puerto Rico, this 30th day of June 2022.

REQUEST

LUMA to provide a summary of its customer outreach program, as well as a progress report pertaining to its implementation

RESPONSE

LUMA understands the importance and benefits of customer outreach as an effective method to inform, engage with, and promote customer opportunities and generate positive results. The 3,000 men and women of LUMA are working hard to reduce the potential for voltage fluctuations – which can damage electronic equipment – stemming from a system that has suffered years – if not decades – of mismanagement and neglect by the prior operator.

While voltage fluctuation events are directly due to the fragility of the system that LUMA inherited, we are committed to providing customers with information on how they can protect their electric devices and equipment from this impact as we work to repair and stabilize the system.

As part of our commitment to our customers, we have initiated a multi-channel public communications campaign aimed at educating and informing our customers on voltage fluctuation issues and the steps they can take to protect their electronic devices, appliances, and equipment in their homes or businesses. This effort includes but is not limited to social media posts, customer engagement and information available on our website.

Our trained and experienced customer service team works with customers who call or visit one of our customer service centers throughout Puerto Rico by providing them information about the resources available to them and information on how to protect personal devices and equipment. LUMA's customer outreach campaign developed and launched its campaign through multiple social media platforms to inform and encourage customers to protect their personal equipment, household electronics and other electrical equipment. This campaign addresses many reasonable ways in which customers can safeguard their household and commercial equipment to prolong their lifespan while also highlighting the need for safety consciousness as it relates to electrical wiring, power surges and electric service interruptions.

As part of the efforts to educate the customers, LUMA also provides educative information about the importance of protecting electrical equipment through the Mi Luma website www.lumapr.com. Across the

website, information about Protecting your personal equipment can be found under the Residential Service options, as Helpful Customer Resources: <https://lumapr.com/protecting-your-personal-equipment/?lang=en>.

As we build a more reliable, more resilient energy system for Puerto Rico, it is important to understand the effects that power fluctuations can have on personal belongings such as electronics, appliances, and equipment. Power Surges are sudden rises in voltage that last for a short period of time – these surges are higher than the average current in your electrical system and can be damaging to electronics and appliances in your home.

Helpful tips for protecting your equipment

To protect your equipment from power surges, follow the helpful tips below to keep your electrical devices safe and ensure that prevent potential safety hazards in the future.

- Invest in a surge protector – they may look like regular power strips, but they have built-in fuses that help redirect power and safeguard the devices plugged in.
- Don't overload your surge protector by plugging in too many high-voltage electronics.
- Look for one with a UL or ETL rating, meaning it's been tested and meets certain safety standards.
- Surge protectors wear out over time. Look for models that warn you when they're weakening.
- If you're planning on using a surge protector for medical equipment, look for a model approved for this purpose.

Will any power strip do?

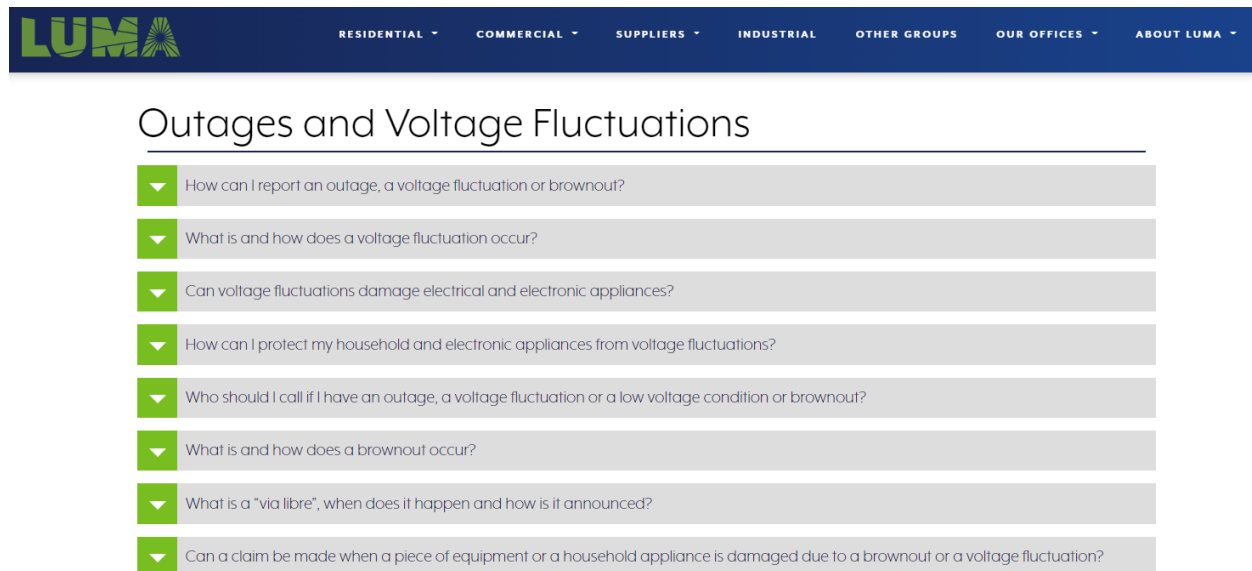

No, not all power strips offer voltage surge protection meant to safeguard your equipment. Follow these tips to help you choose the right surge protector:

- Check the label to ensure it offers surge protection and ensure it has enough ports for the number of devices you own.
- Check the surge protector's energy absorption rating – this tells you how much energy will be absorbed by the device before it triggers the surge protector (the higher the better).
- Check for extra features – surge protectors can have features like automatically turning off the device when it's done charging.

What is the lifespan of a surge protector?

A surge protector can last between 3 to 5 years, but they do become worn out when they endure strong power surges. We recommend that you replace them every 2 years to protect equipment from damage due to voltage fluctuations.

Additionally, under the “frequently asked questions” section, LUMA provides household and electronic appliance protection tips and encourages customers to report outages, voltage fluctuations or brownouts. See LUMA’s website: <https://lumapr.com/faq/?lang=en>

Outages and Voltage Fluctuations

- ▼ How can I report an outage, a voltage fluctuation or brownout?
- ▼ What is and how does a voltage fluctuation occur?
- ▼ Can voltage fluctuations damage electrical and electronic appliances?
- ▼ How can I protect my household and electronic appliances from voltage fluctuations?
- ▼ Who should I call if I have an outage, a voltage fluctuation or a low voltage condition or brownout?
- ▼ What is and how does a brownout occur?
- ▼ What is a “via libre”, when does it happen and how is it announced?
- ▼ Can a claim be made when a piece of equipment or a household appliance is damaged due to a brownout or a voltage fluctuation?

As LUMA works to build a more reliable, more resilient energy system for Puerto Rico, it encourages its customers to understand the effects power fluctuations can have on personal belongings such as electronics, appliances, and equipment. LUMA’s surge protection campaign through social media addresses safety and surge protection topics, as depicted in the images below.

lumapuertorico En momentos de fluctuaciones de energía, asegúrate de apagar interruptores de electricidad y de desconectar equipos eléctricos. Protege equipos como neveras y estufas con protectores de voltaje.

In addition to providing surge protection-oriented campaigns, LUMA is also actively providing customers with safety tips to promote personal equipment protection and avoid accidents by carrying out ongoing social media campaigns, in which it provides simple equipment protection knowledge and tips, that can have a remarkable impact on household safety, and the lifespan of household electronics and appliances, examples of which can be seen in the images below.

lumapuertorico Los multienchufes pueden ser prácticos, pero tenemos que tomar medidas para evitar accidentes:

✓ Utiliza multienchufes con la aprobación UL.

⚡ Los multienchufes no son soluciones permanentes. Si necesitas más enchufes de pared, contacta a un perito electricista.

⚠ No los conectes unos con otros.

🔥 No pases un multienchufe por debajo de alfombras, porque puede sobrecalentarse.

lumapuertorico Siempre que utilices un multienchufe, no lo sobrecargues y asegúrate de que el mismo pueda manejar el amperaje del equipo que quieres conectar. Si sientes que se recalienta, apágalo inmediatamente.

#LUMA #Seguridad

lumapuertorico Siempre que vayas a utilizar un equipo eléctrico (taladros, pulidoras, aspiradoras, etc.) asegúrate de que la cablería esté en perfecto estado. Si ves un cable expuesto o la cubierta de plástico o de goma en malas condiciones, no uses el equipo.
