COMMONWEALTH OF PUERTO RICO PUBLIC SERVICE REGULATORY BOARD PUERTO RICO ENERGY BUREAU

IN RE: Request for Certification

Case no. NEPR-CT-2022-0003

CIRO One Salinas, LLC

Subject: 2025 Operational Report

MOTION TO REQUEST CONFIDENTIAL TREATMENT OF 2025 OPERATIONAL REPORT AND ANNEXES

TO THE HONORABLE ENERGY BUREAU:

COMES NOW CIRO One Salinas, LLC ("CIRO One") represented by the undersigned legal counsel, and very respectfully prays and requests:

- 1. Section 2.02 of the Puerto Rico Energy Bureau's Amended Regulation No. 8618 on Certifications, Annual Charges and Operational Plans of Electric Service Companies in Puerto Rico, Regulation No. 8701, requires electrical energy companies to annually file operational reports containing the information required therein. Specifically for electrical service companies that provide distributed generation services, such companies must include information on the projection of the energy demand it intends to meet; the charges and rates it charges its customers and company efforts to orient clients and promote efficient electric energy consumption; its projected capital investments; and the information of entities it hires to operate its systems.
- 2. Furthermore, on February 12, 2019, the Energy Bureau issued an *Order* requiring additional information that electrical service companies that distributed generation services must include in their operational reports: total and net generation

produced by a system during the period prior to the filing of the operational report; times of operation and capacity factor for the period prior to the filing of the operational report; and information on scheduled and unscheduled outages occurred during the period prior to the filing of the operational report.

- 3. First, CIRO One is hereby complying with Section 2.02 of Regulation 8701 and herein submitting its operational report form and corresponding annexes for the year 2025 (**Attachment 1**). CIRO One also includes the required information applicable to it pursuant to the Energy Bureau *Order* dated February 12, 2019, in the annexes attached hereto.
- 4. Second, CIRO One Salinas, LLC requests that it be waived from payment of the \$800.00 filing fee of the operational report. Section 2.03(B) of Regulation No. 8701 provides that

In cases where, pursuant to the provisions of Subsection (D) of Section 2.02 of this Regulation, the [Bureau] orders an electric service company to submit information to the [Bureau] and said company believes that the payment of the amount corresponding to the fee for the submission of the Operational Report would be onerous, the company in question may request that the [Bureau] waive the requirement to pay the fee for the submission of the Operational Report. In such cases, the company must file, together with the information required by the [Bureau], a motion wherein it sets forth the facts and explains the legal basis that justifies said waiver of payment.

CIRO One Salinas, LLC's solar system that is subject to regulation by the Honorable Energy Bureau is not yet operational, as explained in the operational report annexes, and thus has still not generated any revenues. Therefore, CIRO One Salinas, LLC reasonably believes that the \$800.00 filing fee is inapplicable and onerous for the company given the present circumstances.

5. CIRO One requests that the information contained in the form and annexes be kept confidential. Section 6.15 of Act No. 57 of May 17, 2014, as amended, provides:

If a person having the obligation to submit information to the Energy Commission understands the information to be submitted is privileged or confidential, [such person] may request said Commission to give [privileged or confidential] treatment subject to the following:

- (a) if the Energy Commission, after due evaluation, understands the information should be protected, it shall find a way to grant this protection in the manner that impacts less the public, transparency and the rights of the parties involved in the administrative proceeding under which the alleged confidential document is being filed.
- (b) To such effects, the Energy Commission may grant access to the document, or to portions of the document that are privileged, only to counsel and external consultants involved in the administrative proceeding after execution of a confidentiality agreement.
- (c) The Energy Commission shall keep documents presented before it completely out of public scrutiny only in exceptional cases. In such cases, the information shall be duly safeguarded and delivered exclusively to Energy Commission personnel on a need-to-know basis, under non-disclosure rules. However, the Energy Commission shall order that a non-confidential version for public review be submitted.
- (d) Any claim of privileged or confidential information by a person under the jurisdiction of the Energy Commission must be ruled in an expedited manner by the Commission through a resolution to such effects, before any confidential information alleged by a party is disclosed.

- 6. In turn, Section 1.15 of the Regulation No. 8701 provides that when a person who is required to submit information to the Energy Bureau considers such information to be privileged or confidential, the person shall identify the information it deems privileged or confidential, request the Energy Bureau to protect such information, and present arguments supporting the privilege or confidentiality claim. The Energy Bureau shall evaluate the petition and, if it concludes the information merits protection, it shall proceed pursuant to Section 6.15 of Act No. 57.
- 7. CIRO One is a privately held company, and its information, contained in the operational report and annexes (Attachment 1), on the projection of the energy demand it intends to meet; information on the charges and rates it charges its customers and company efforts to orient clients and promote efficient electric energy consumption; information on its projected capital investments; and information on entities it hires to operate its systems if such is the case is confidential, of sensitive nature, and not available to the public. Also, information regarding total and net generation data, regarding times of operation and capacity factor, and regarding circumstances related to outages is also of sensitive nature. Were such information be made public, specifically to industry competitors, CIRO One would suffer economic harm, as knowledge of CIRO One's business dealings, the prices it charges its customers, the investments it intends to make, its business projections, and the identity of its industry partners as well as the technical information required by the Energy Bureau would put CIRO One in a position of disadvantage. CIRO One requests that the Energy Bureau only grant access to said information to internal Energy Bureau

personnel, counsel, and consultants subject to the execution of a confidentiality

agreement.

8. In compliance with Section 6.15 of Act 57-2014, Section 1.15 of Regulation 8701

and the In Re: Policy on Management of Confidential Information in Procedures Before

the Commission, CEPR-MI-2016-0009, August 31-2016, Resolution ("Confidential

Treatment Resolution"), CIRO One is filing a redacted and unredacted version of the

information and documents for which it is requesting Confidential Treatment.

WHEREFORE, CIRO One Salinas, LLC respectfully requests that the Honorable

Energy Bureau take notice of CIRO One's submission of its operational report and that

the operational report and annexes in this motion be granted confidential treatment; and

that it be waived payment of the \$800.00 filing fee for its operational report.

Respectfully submitted, on March 31, 2025, in San Juan, Puerto Rico.

Requirement

Projection of the percent of the total demand that it intends to meet in Puerto Rico (Section 2.02 (A)(1)(a) of Regulation No. 8701)

Requirement

Information regarding charges and rates, and the company efforts to orient clients and promote efficient electric energy consumption (Section 2.02 (A)(1)(b) of Regulation No. 8701)

Requirement

Projection of capital investments for the next year after the submission of the Report (Section 2.02 (A)(1)(c) of Regulation No. 8701)

Requirement

Contact information and credentials of the entity to be hired in case that the system is contracted (Section 2.02 (A)(1)(d) of Regulation No. 8701)

Requirement

Total generation, in MWh, produced by the system during the period prior to the filing of the operational report (Puerto Rico Energy Bureau Order dated February 12, 2019, CEPR-MI-2015-0006)

Requirement

Net generation (total generation minus consumption), in MWh, produced by the system during the period prior to the filing of the operational report (Puerto Rico Energy Bureau Order dated February 12, 2019, CEPR-MI-2015-0006)

Requirement

Hours of operation during the period prior to the filing of the operational report. (Puerto Rico Energy Bureau Order dated February 12, 2019, CEPR-MI-2015-0006)

Requirement

Capacity factor during the period prior to the filing of the operational report. (Puerto Rico Energy Bureau Order dated February 12, 2019, CEPR-MI-2015-0006)

Requirement

Scheduled interruption, specifying date, time, duration, and purpose of interruptions of electrical equipment of the company during the period prior to the filing of the operational report (Puerto Rico Energy Bureau Order dated February 12, 2019, CEPR-MI-2015-0006)

Requirement

Non-scheduled interruptions, specifying date, time, duration, and cause of interruptions of electrical equipment of the company during the period prior to the filing of the operational report (Puerto Rico Energy Bureau Order dated February 12, 2019, CEPR-MI-2015-0006)
