PUERTO RICO PUBLIC SERVICE REGULATORY BOARD
PUERTO RICO ENERGY BUREAU**

IN RE: REVIEW OF THE PUERTO RICO
ELECTRIC POWER AUTHORITY
INTEGRATED RESOURCE PLAN

CASE NO.: NEPR-AP-2023-0004

SUBJECT: LUMA Filing of Responses to
Informal Requests of Information Issued to
LUMA – Modeling Scenarios.

RESOLUTION AND ORDER

On May 13, 2025, the Energy Bureau of the Puerto Rico Public Service Regulatory Board ("Energy Bureau") issued a Resolution and Order ("May 13 Resolution") directing LUMA¹ to file the Integrated Resource Plan ("IRP") on October 17, 2025. The May 13 Resolution also directed LUMA to separately file transmission and distribution system implications of the Preferred Resource Plan on November 21, 2025.² The May 13 Resolution included a "*Revised Scenario Structure for IRP Filing Inclusive of Act 1-2025 Requirements*" as Attachment A. LUMA was directed to use the updated³ scenario structure in Attachment A to conduct IRP resource modeling to inform selection of a Preferred Resource Portfolio. Regulation 9021⁴ requires LUMA to identify a Preferred Resource Portfolio in its IRP proposal.

During April and May of 2025, the Energy Bureau technical consultants have held several meetings with LUMA and LUMA's technical consultants to discuss resource modeling parameters associated with the scenario structure described in Attachment A to the Energy Bureau's May 13 Resolution. The Energy Bureau's technical consultants issued informal requests of information to LUMA as a matter of course during those sessions. LUMA has responded to requests to answer those informal requests of information. LUMA is **DIRECTED** to file the responses to those requests in this docket. As necessary, some of the information filed at this time is anticipated to be treated in a confidential manner.

Be it notified and published.

¹ LUMA Energy LLC and LUMA Energy ServCo LLC (jointly referred as, "LUMA").

² The Energy Bureau's May 13, 2025 Resolution and Order in this Case contains conflicting filing dates for the November 2025 additional information concerning transmission and distribution system implications of the Preferred Resource Plan. The correct filing date is November 21, 2025.

³ The revised scenario structure was an update to the Energy Bureau's March 13, 2024 Resolution and Order approving an IRP resource scenario structure.

⁴ Regulation on Integrated Resource Plan for the Puerto Rico Electric Power Authority, April 24, 2018 ("Regulation 9021").
