GOVERNMENT OF PUERTO RICO
PUBLIC SERVICE REGULATORY BOARD
PUERTO RICO ENERGY BUREAU

IN RE: Request for Certification
NFE POWER PR LLC.

CASE NO.: NEPR-CT-2022-0004

SUBJECT: Evidence of payment and
public version of confidential
documents.

MOTION IN COMPLIANCE WITH RESOLUTION AND ORDER

TO THE HONORABLE ENERGY BUREAU:

COMES NOW NFE POWER PR LLC (“NFE POWER”), represented by the undersigned attorney, and very respectfully states, alleges, and prays:

1. On March 20, 2025, NFE POWER submitted with this Honorable Bureau its Operational Report for Electric Services Companies required pursuant to Section 2.02(A) (1) of Regulation 8701 as amended.
2. In its Operational Report, NFE POWER informed under Section 2.02 (A) (1) (d) that it contracts, as part of the operation of its system, with the following entities: Mr. Emanuel Ortiz, General Manager, Power Engineering Consultants, LLC (Operations and Supervision); AB Energy USA, LLC (LTSA Services); and M.R. Franceschini, Inc. (Heat recovery and steam generator services). The same section of the Operational Report provides contact information for all three contractors.
3. On July 30, 2025, the Puerto Rico Energy Bureau, issued a Resolution and Order in which it Ordered NFE POWER to, within 15 days from notification therewith, “submit the credentials

of the entity contracted to operate its system, as required by Section 2.02(A)(1)(d) of Regulation 8701”. This Section of Regulation 8701 provides in Spanish:

En caso de que toda o parte de la operación del sistema ha de ser contratada a alguna entidad, deberá proveer el nombre, información de contacto y credenciales de la entidad a ser contratada; y cualquier otra información que se requiera en el formulario correspondiente de la Comisión.

The term “credentials” is not defined under Regulation 8701.

4. Furthermore, in its resolution and order, the Honorable Bureau required, beyond the requirements of Section 2.02(A)(1)(d), that the submitted credentials be accompanied by: a. the legal structure (LLC, corporation), jurisdiction, and country of organization; b. a certificate of incorporation and registration; c. a certificate of good standing (dated within three months); d. a certificate of authorization to do business (if contracting with foreign entities); and e. any additional information required by the Bureau or its forms.
5. The resolution and order also require evidence of the contracted entity's capacity, along with a summary of its operational personnel, as well as its technical qualifications and licenses.
6. In compliance with the Resolution and Order, NFE POWER hereby informs that the following are the entities contracted by NFE POWER in connection with the system:
 - a. MR Franceschini, Inc., is a Puerto Rico for profit corporation that provides preventive and corrective maintenance of cogeneration boilers in connection with the system. Since 1961, M. R. Franceschini, Inc. has grown and developed into a diversified Industrial Technologies Sales & Services organization. Their focused specializations include Process Instrumentation, Steam & Thermal Energy Systems, Fluid Control Solutions and Tank Protection. We hereby attach to this motion the corporation's Certificate of Good Standing, Certificate of existence, along with evidence of recent employee training (which includes a list of names of

the supporting staff), and a general list of services, parts and equipment provided by M.R. Franceschini to its clientele in the Power Generation industry (the list is provided for illustration of their credentials and does not mean that they provide all these parts and services to NFE POWER). More information about this corporation can be found on their website at www.mrfpr.com or contacting them directly using the contact information provided in NFE POWER's operational report.

- b. Power Engineering Consultants, LLC is a Puerto Rico Limited Liability Company, that has been operating in Puerto Rico since 2018, and that provides general operation and supervision support services in connection with the operation of the system. Mr. Emanuel Ortiz, P.E. provides services through Power Engineering Consultants, LLC. He is an experienced and licensed professional engineer authorized to practice in Puerto Rico and in good standing. We hereby attach to this motion the company's certificate of existence and certificate of good standing, along with evidence of engineer Emanuel Ortiz' good standing as a licensed PE in Puerto Rico (screen shot of Puerto Rico College of Engineers and Surveyors).
- c. AB Energy USA, LLC, is a New Jersey Limited Liability Company, authorized to do business in Puerto Rico and in good standing as of August 12, 2025. This company specifically provides preventive and corrective maintenance on the two 1.4 MWh generators of the system. AB Energy has global presence in the energy and other industrial sectors and has proven capabilities regarding natural gas co-generation systems. More information about their services and capabilities can be found on their website www.gruppoab.com or via direct contact using the contact information provided in NFE POWER's operational report. Along with the

company's certificate of existence and certificate of good standing, we hereby attach a series of certificates that relate to AB's technical qualifications. NFE POWER has requested AB Energy additional information on their Puerto Rico support team's qualifications and will supplement this motion with additional information once available.

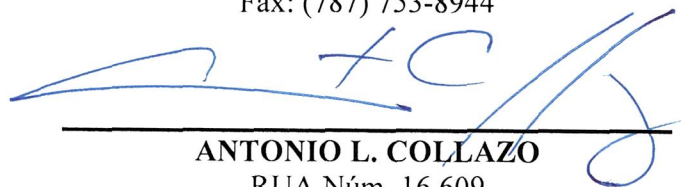

7. NFE POWER hereby clarifies that it is the primary party responsible for overseeing the operation of the system. The companies, persons and entities mentioned in the operational report are contractors that provide services in their specific areas of business and expertise, but they are not the "operators" of the system for regulatory and legal purposes. They are reported under Section 2.2 A. (1)(d) of the Operational Report for transparency purposes, but they do not substitute NFE POWER as the operator of the system and do not provide direct services to, nor invoice services to, Boehringer Ingelheim Animal Health, who is NFE POWER's sole customer in connection with the system.

WHEREFORE, NFE POWER respectfully requests the Puerto Rico Energy Bureau to take notice of the foregoing and determine that NFE POWER has complied with the Resolution and Order dated July 30, 2025.

RESPECTFULLY SUBMITTED.

In San Juan, Puerto Rico, on August 14, 2025.

"LA VALIDITÀ DEL PRESENTE CERTIFICATO È SUBORDINATA A SORVEGLIANZA PERIODICA A 12 MESI E AL RIESAME COMPLETO DEL SISTEMA DI GESTIONE AZIENDALE CON PERIODICITÀ TRIENNALE"
"THE VALIDITY OF THE PRESENT CERTIFICATE DEPENDS ON THE ANNUAL SURVEILLANCE EVERY 12 MONTHS AND ON THE COMPLETE REVIEW OF COMPANY'S MANAGEMENT SYSTEM AFTER THREE-YEARS"

INTEGRATED MANAGEMENT SYSTEM

Since 1981, AB has tackled the challenges posed by energy sustainability, working alongside our customers to improve their competitiveness while saving energy and reducing emissions. AB provides high-efficiency plants and innovative technologies in the w of energy transformation.

For AB, promoting research is fundamental, along with experimenting with new solutions, respecting the environment, promoting energy efficiency, and guaranteeing suitable working conditions. These measures are all aimed at achieving continuous improvement and full customer satisfaction.

It is of fundamental importance to adequately define the policy and strategic objectives to be pursued by the company, placing them at the basis of the development of its Management System, its products, its internal processes and its very nature.

The Integrated Policy aims to be the reference for the correct management of all processes and all activities, with the aim of guiding and directing the behaviour of the entire company.

AB Group, in particular AB Impianti and AB Service (located in Orzinuovi, Italy), in order to reach its strategic objectives, adopted an **Integrated Management System** compliant with requirements of the following regulations and standards:

- UNI EN ISO 9001:2015 - Quality
- UNI EN ISO 14001:2015 - Environment
- UNI EN ISO 45001:2023 - Health and Safety
- UNI EN ISO 50001:2018 – Energy (**only ABI – Address: via G. Agnelli, 9, Orzinuovi*)
- UNI EN ISO 3834-2:2006 - Welding (**only ABI*)
- UNI EN 1090-1-2:2012 - Structural Steel (**only ABI*)
- Commission Regulation (EC) N° 303/2008 - Fluorinated Gases
- Directive 2014/68/EU (PED) (**only ABI*)
-

Professional ethics, in concert with technical preparation and knowledge, allow all personnel at AB to perform their work while reducing to a minimum the impacts that the realisation and installation of systems could have on people and the environment.

In particular, the company places the utmost attention on the following issues:

- guarantee compliance with current legislation, regulations and structured agreements pertaining to issues relating to quality, environment, energy and safety;
- implement effective communication of the strategic objectives defined by Top Management, translating them into operational objectives, plans and programmes for their implementation;
- consolidate and increase the company's market share in the renewable energy sector, in particular cogeneration, biomethane and photovoltaic, introducing with the Integrated Management System and with the appropriate certifications a qualifying and differentiating element that places the company in a more competitive position with respect to direct competition, and that also allows it to improve company profitability;
- obtain the full satisfaction of its customers, offering them products and services with punctuality, at reasonable costs and in compliance with ethical, social and environmental characteristics of interest to both the customer and the organisation itself;
- reduce staff health and safety risks and prevent occupational accidents and illnesses as effectively as possible, through the involvement and consultation of workers and their representatives on all health and safety aspects, and by taking advantage of the most appropriate organisational and management measures, and in general promote a safety culture;
- promote wellbeing in the workplace by supporting the WHP - Workplace Health Promotion Project for the promotion of an active lifestyle, healthy eating, combating smoking and addictions and supporting work-family reconciliation;
- obtain Management System certifications by an accredited third-party certification body
- periodically review, in a critical manner, the entire Integrated Management System;
- assess risks and opportunities linked to each activity taking place at AB, with the aim of improving the performance of all company processes;

- seek continuous improvement in the fields of quality, environment, health, safety and energy, defining and implementing specific objectives and programs to increase the performance of its processes and products in these areas, and using, where possible, the best technologies available, making all the necessary resources available and encouraging cooperation between the different company functions;
- ensure full compatibility and adequacy of products, production processes, materials, infrastructures, and every possible resource with the environment, always keeping in focus the aspects related to personnel health and safety;
- provide adequate training and information to all staff, in order to encourage the spread of corporate know-how and organizational knowledge, to enhance the skills and abilities of each one, with a particular emphasis on issues related to health and staff safety, the environment, energy efficiency and to respect the quality specifications defined by the Top Management;
- aim for sustainable management of all production processes, paying particular attention to the reduction of waste (reduction of waste from processing, careful management of the air conditioning, optimization of component logistics, adoption of the Lean method with the aim of optimizing the production process, print management, etc.), the rational use of resources, the continuous improvement of energy performance and increasing, where technically possible, the use of energy produced from renewable sources;
- manage waste correctly, trying to minimize the quantities produced, recycling/recovering it where possible, and disposing of it appropriately;
- manage corporate emissions affecting the different environmental matrices (atmospheric emissions, water discharges, etc.) in compliance with current legislation and implement interventions to reduce their quantity and/or limit/mitigate their effects on the environment;
- carry out activities in the presence of fluorinated greenhouse gases in an adequate and regulated manner, in order to limit their emissions into the atmosphere and consequently contribute to the reduction of the greenhouse effect;
- promote correct management of dangerous substances and materials in use within the organization, verifying compliance;
- manage emergencies correctly;
- support the planning of activities and the purchase of products and services that have an impact on the energy and environmental performance of AB;
- protect the environment and prevent pollution;
- mitigate impacts by supporting the fight against climate change, thanks to energy efficiency and the adoption of circular economy practices (the company adheres to the "Brescia 2050 Sustainability Pact");
- support initiatives for the protection of ecosystems and biodiversity.

The company values and ethical standards of behaviour are summarised in the 'AB WAY' document, which guides the choices and behaviour of all the people working at AB towards customers, suppliers, partners, competitors, institutions, non-governmental organisations and, in general, all those involved in the group's activities: working ethically is a priority that Top Management cultivates within the company, guiding all behaviour in this sense.

Correct conduct is essential for the company's development and progress, which is why, within the 'Code of Ethics' document, the principles and good practices that must be followed during daily work have been defined.

This document enables all stakeholders to know, understand and share AB's core values and rules of conduct.
