

CONTRACTOR'S STATEMENT OF QUALIFICATIONS

1. Organization

Name: CAMS Puerto Rico, LLC

Address: 910 Louisiana Street, Suite 2400, Houston, TX 77002

2. Key personnel experience

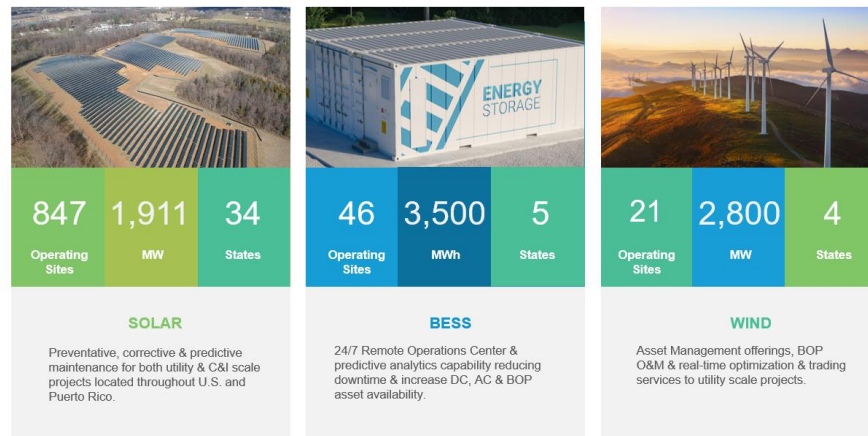

A. Operational asset: San Fermin Solar Farm, LLC

B. Experience:

Consolidated Asset Management Services (CAMS) was established in 2007 with its corporate headquarters in Houston, Texas. Having experienced significant growth since our formation, CAMS provides services to customers in North America, Europe, Latin America, Africa, and the Middle East.

We provide "value-added" services for owners of power generation and energy assets, including some of the world's largest financial institutions, independent power producers (IPPs), manufacturers, and private equity firms. Our experienced team of commercial, operations and financial professionals maintain efficient, safe, and highly reliable facilities while constantly looking for opportunities to improve performance, reduce costs, and increase efficiencies to meet and exceed client expectations.

Since 2007 CAMS has had an average annual MW increase in renewables involvement of 28% and has placed a significant emphasis on both renewables and BESS services via CAMS Energy Transition Services (CAMS ETS). CAMS possesses an extensive geographic footprint of technicians throughout North America and Puerto Rico. Responsible site managers oversee a deep bench of cross-trained solar, wind and BESS technicians. In the Puerto Rico region, CAMS operates around 34 MW of Utility and commercial scale solar systems.

C. Personnel qualifications:

1. Ramon Almodovar (CAMS Puerto Rico Operation Manager):

Electrical engineering professional with extensive experience in the renewable energy sector, specializing in operations and maintenance (O&M) management. Ramon serves as CAMS' Puerto Rico field service manager with a focus on solar and BESS. In this role he oversees the efficient functioning of renewable energy projects, ensuring optimal performance and sustainability.

2. Jose Burgos (Electrician and solar technician):

Seasoned Electrician with over 10 years of experience and 5 years of solar experience in utility and commercial scale systems. Licensed electrician record 10709.

3. Luis Colon (Solar technician):

Solar and BESS technician with over 10 years of experience working on Utility Scale solar system. Supervisor at San Fermin Solar Farm, one of the first Utility Scale projects in Puerto Rico that meets the Minimum technical requirements from PREPA.

D. Services:

CAMS Puerto Rico perform the day-to-day operation and maintenance of San Fermin Solar Farm which is a 28 MW solar project located in Loiza, PR. The tasks include the corrective and preventive maintenance of solar equipment, including but not limited to panels, inverters and battery energy storage. The overall service includes the following:

- Preventive maintenance
- Corrective and reactive maintenance

- c. Monitoring and performance analysis
- d. Vegetation management
- e. Regulatory compliance management
- f. Accounting
