Building A Better Energy Future For Puerto Rico: Progress Dashboard

LUMA is focused on taking long-term actions to build a more reliable and more resilient energy system for our 1.5 million customers, while continuing our commitment to respond to outages and repair infrastructure across Puerto Rico. Every day, we are making historic progress on island-wide projects and initiatives underway, which are improving reliability and support for our customers. Below provides an overview of the progress we are making on these projects and initiatives.

Improvement Projects

Moving projects forward to help rebuild and transform the electric system

- ✓ **519** projects initiated
- ✓ **457** projects with detailed scopes of work
- ✓ **191** projects obligated
- ✓ **186** projects where construction is completed or in progress

Community Streetlight Initiative (<https://Progresodelumapr.Com/En/Our-Progress/Community-Streetlight-Initiative/>)

Install 300,000 streetlights across all 78 municipalities to improve safety and energy efficiency

Goal by 6/30/25:

Install 177,500 Streetlights ✓

Progress To Date:

180,000 Streetlights Installed

Substation Equipment Improvements (<https://Progresodelumapr.Com/En/Our-Progress/Substation-Modernization/>)

Assess and carry out equipment upgrades at substations to address high voltage and improve reliability

Goal by 6/30/25:

Complete 34 Substation Assessments

Progress To Date:

34 Substation Assessments Completed

Goal by 6/30/25:

Start or Complete 83 Equipment Upgrades

Progress To Date:

85 Upgrades Underway or Completed

Vegetation Safety and Reliability Initiative (<https://progresodelumapr.com/en/vegetation-safety-and-reliability-initiative/>)

Clear vegetation from powerlines to minimize downed poles and reduce power outages

Goal by 6/30/25:

Clear 190 Miles of Vegetation from Powerlines

Progress To Date:

111 Miles of Vegetation Cleared from Powerlines

Routine Vegetation Trimming

Trim hazardous vegetation from infrastructure to minimize outages as part of daily vegetation management operations

Goal by 6/30/25:

Clear 6,400 Miles of Vegetation from Powerlines

Progress To Date:

6,484 Miles of Vegetation Cleared from Powerlines

Smart Meter Initiative

(<https://Progresodelumapr.Com/En/Smart-Meter-Initiative/>)

Assess and install 1.5 million smart meters to plan for future improvements to provide fast outage response

Goal by 6/30/25:

Assess 270,000 Smart Meters ✓

Progress To Date:

456,507 Meters Assessed

Goal by 6/30/25:

Install 20,000 Smart Meters

Progress To Date:

9,820 Meters Installed

Customer Energy Savings Programs

Help customers save energy at their home or business

Goal by 6/30/25:

Save 38,960 MWh of Energy

Progress To Date:

31,190 MWh of Energy Saved

Pole Replacement Program

(<https://Progresodelumapr.Com/En/Our-Progress/Pole-Replacement/>)

Replace 100,000 poles to strengthen the electric system against storms

Goal by 6/30/25:

Replace 28,500 Poles ✓

Progress To Date:

32,400 Poles Replaced

Grid Automation Devices

(<https://Progresodelumapr.Com/En/Our-Progress/Pole-Replacement/>)

Install automation devices to reduce outage impact

Goal by 6/30/25:

Install 10,350 Devices ✓

Progress To Date:

10,384 Devices Installed

Data as of 6/30/2025. All the data above may vary from metrics that are regularly reported to the Puerto Rico Energy Bureau and other agencies. The content included in this dashboard is for informational use only and is subject to change without notice.
