

**GOVERNMENT OF PUERTO RICO  
PUERTO RICO PUBLIC SERVICE REGULATORY BOARD  
PUERTO RICO ENERGY BUREAU**

**IN RE:** REVIEW OF THE PUERTO RICO  
ELECTRIC POWER AUTHORITY  
INTEGRATED RESOURCES

**CASE NO.:** NEPR-AP-2023-0004

**SUBJECT:** Determination on Request for  
Extension of Time.

**RESOLUTION AND ORDER**

On December 3, 2025, the Energy Bureau of the Puerto Rico Public Regulatory Board (“Energy Bureau”) issued a Resolution and Order requiring LUMA Energy ServCo LLC and LUMA Energy LLC (collectively “LUMA”), as agent of the Puerto Rico Electric Power Authority (“PREPA”), a public power electric utility and an instrumentality of the Government of Puerto Rico to file responses to the First Set of 2025 IRP Post Filing Request for Information (“ROI”) within fifteen (15) business days of the notice of the Resolution and Order (“December 3 Order”). The First Set of 2025 IRP Post Filing ROI focuses on the 2025 IRP completeness, including the need for LUMA to provide further clarity on some aspects of the 2025 IRP Report and to provide additional explanation and workpapers in support of the material filed.

On December 22, 2025, LUMA filed a document titled *Motion Submitting Responses to the First Set of 2025 IRP Post Filing Request of Information in Compliance with Resolution and Order of December 3, 2025* (“December 22 Motion”). In the December 22 Motion, LUMA submitted narrative responses to all questions on this set, except for those requiring the data referenced in question four of the First Set of 2025 IRP Post Filing ROI. More specifically, LUMA submitted as Exhibit 1 the information responsive to the requests for information addressing the 2025 IRP completeness.

According to LUMA significant time and resources are required to extract the data from PLEXOS®, referenced in question four, spanning a 20-year period across all Scenarios and iterations, and at the hourly level. LUMA requested an extension to submit the hourly data of all Scenarios along with detailed responses to questions 4b, 4c, 4d, and 8d, which are directly related to that data, no later than January 15, 2026. LUMA explained that the decision to divide the responses stems from the significant time and resources required to extract the requested hourly data from PLEXOS®, spanning twenty (20) years across scenarios, iterations, and the hourly level. Finally, LUMA indicated it may further refine its response to other questions based on the detailed hourly data extracted.

Upon review of the December 22 Motion, the Energy Bureau **GRANTS** LUMA until **January 15, 2026** to submit the hourly data of all Scenarios along with detailed responses to questions 4b, 4c, 4d, and 8d, which are directly related to that data.

Be it notified and published.
