PUBLIC SERVICE REGULATORY BOARD
PUERTO RICO ENERGY BUREAU**

IN RE: REVIEW OF THE PUERTO RICO
ELECTRIC POWER AUTHORITY'S 10-YEAR
INFRASTRUCTURE PLAN – DECEMBER
2020

CASE NO.: NEPR-MI-2021-0002

SUBJECT: Status of evaluation of Palo Seco
3 & 4 and San Juan 7 & 9 Conversions

RESOLUTION AND ORDER

On January 9, 2026, Genera PR LLC ("Genera") filed before the Energy Bureau of the Puerto Rico Public Service Regulatory Board ("Energy Bureau") a request seeking approval of the proposed scope of work related to the conversion of Palo Seco Units 3 and 4 to operate with natural gas as the primary fuel, while maintaining Fuel Oil No. 6 (also known as Bunker C, "FO6") as a backup fuel.¹ The requested approval is intended to authorize the submission of such Scope of Work to the Federal Emergency Management Agency ("FEMA") under the Public Assistance Program Alternative Procedures authorized pursuant to Section 428 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Thereafter, by motion dated January 14, 2026, Genera submitted a similar request seeking authorization for submit a *Scope of Work* for the conversion, under comparable terms, of Units 7 and 9 at the San Juan Power Station.² Upon receipt of the foregoing documentation, the Energy Bureau promptly commenced the evaluation process of the requests submitted.

Subsequently, by communication dated January 27, 2026, representatives of Genera requested that an informal technical meeting be held with representatives of the Energy Bureau, including its staff, consultants, and/or Commissioners, for the purpose of discussing certain technical and operational aspects associated with the proposed conversions. Genera proposed that such meeting be held on February 2 or 3, 2026. After a preliminary review, the Energy Bureau delegated to members of its staff and consultants the initial evaluation of the matters to be discussed during the requested technical meeting. The meeting was scheduled for February 3, 2026, as proposed by Genera. It was clarified, in reference to the meeting to be held, that any statements, positions, or comments made by personnel attending or participating in such informal technical meetings on behalf of the Energy Bureau, including Commissioners, if any participate, shall not be construed as final decisions of the Energy Bureau. It was further emphasized that final decisions may only be adopted by the Commissioners acting in accordance with the applicable legal and statutory provisions governing the Energy Bureau's decision-making authority.

In order to facilitate a productive discussion, the Energy Bureau's staff issued a communication requesting that Genera provide certain information and submit clarifying responses regarding the proposed conversion of Palo Seco Units 3 and 4. Given the proximity of the proposed meeting date, it was anticipated that the requested information might not be fully available prior to the meeting. Accordingly, and in the interest of advancing the clarification process and promoting administrative efficiency, the Energy Bureau determined that the meeting should proceed as scheduled so that the parties could discuss the available information and identify any outstanding issues requiring further clarification.

The meeting was held on February 3, 2026, and was attended by several representatives of Genera and the Energy Bureau. During the discussion, Genera provided additional explanations regarding certain aspects of the proposed projects and informed the Energy Bureau that certain circumstances had changed subsequent to the filing of its requests. As a

¹ See *Motion Requesting Leave to Submit for Approval to COR3 and FEMA the SOW to Convert Palo Seco Units 3 & 4 to Operate with Natural Gas as Primary Fuel* filed by Genera on January 9, 20236 ("January 9 Motion").

² See *Motion Requesting Leave to Submit for Approval to COR3 and FEMA the SOW to Convert San Juan Units 7 & 9 to Operate with Natural Gas as Primary Fuel* filed by Genera on January 14, 2026 ("January 14 Motion").

result, Genera indicated that modifications to its previously submitted proposals would be necessary in order for the projects to be evaluated under current conditions, noting that some of these matters remain under internal evaluation.

In light of the discussions held and the anticipated modifications to the projects, the Energy Bureau notes that the scope and basis of the ongoing evaluation may materially change. Accordingly, the Energy Bureau will await the filing of the modified proposals, together with the information necessary to support their evaluation. Upon receipt of such filings, the Energy Bureau will proceed with the evaluation of the revised proposals with due diligence and promptness, consistent with its statutory responsibilities.

Be it notified and published.
