Dear Chairman Avilés Deliz and Associate Commissioners:

This letter serves to acknowledge FranklinWH Energy Storage Inc. (“FranklinWH”) receipt of the Resolution and Order issued on September 4, 2025, in relation to our Request for Certification as an Electric Service Company (Case No. NEPR-CT-2025-0010).

In direct response to the Energy Bureau request, FranklinWH hereby explicitly confirms that we do seek certification as a Demand Response Aggregator, as defined in Regulation 9246, and therefore as an Electric Service Company under Law 57-2014.

We recognize that our initial application, focused on our photovoltaic (PV) distributed generation and energy storage infrastructure, may have created ambiguity about the specific type of certification sought. We clarify that this infrastructure constitutes the technological platform upon which we will operate our demand-aggregation services, coordinating the distributed storage capacity of our portfolio of customers to provide demand response services to LUMA Energy and/or the electric grid.

We appreciate the Board’s guidance and reaffirm our commitment to operate in full compliance with the applicable regulations.

Best regards,

**Pedro Velez**

Product Manager, Puerto Rico
