Urgent Motion to Submit Important Updated
Information Regarding the Status of
Emergency Generation and Black-Start
Generation Project Development

**URGENT MOTION TO SUBMIT IMPORTANT UPDATED INFORMATION
REGARDING THE STATUS OF EMERGENCY GENERATION AND BLACK-START
GENERATION PROJECT DEVELOPMENT**

TO THE ENERGY BUREAU:

COMES NOW, GENERA PR, LLC (“Genera”), through its undersigned counsel and, very respectfully, states and prays as follows:

1. On July 1, 2024, Genera filed a document titled *Motion to Submit Bi-weekly Report on the Status of Emergency Generation and Black-Start Generation Procurement in Compliance with Resolution and Order Dated January 23, 2023* (“July 1 Motion”), in which Genera informed that starting on July 1, 2024, pursuant to Footnote 16 of the January 23 Order, reports would be submitted on a quarterly basis, consistent with the fiscal year’s quarters (e.g., July 1 to September 30 for Q1, October 1 to December 31 for Q2, and so forth), and that their next report was due by October 9, 2024.

2. On July 30, 2024, the PREB issued a *Resolution and Order* (“July 30 Resolution”) in which, in relevant part, denied Genera’s request to submit quarterly reports instead of bimonthly reports, and ordered Genera to submit monthly reports beginning on August 15, 2024.

3. On February 6, 2026, Genera filed a document titled *Motion to Submit Monthly Report on the Status of Emergency Generation and Black-Start Generation Procurement in Compliance with Resolution and Order of July 30, 2024* (“February 6 Motion”).

4. Notwithstanding the foregoing, Genera respectfully informs the Energy Bureau that important developments occurred after the filing of the February 6 Motion that are scheduled to be fully reported in the February monthly report, which is due in March 2026. However, given the relevance of these developments to the status of emergency generation and black-start procurement, Genera believes it is important to promptly notify the Energy Bureau of this information in advance of the upcoming report.

5. On February 19, 2026, Genera received two (2) turbines and six (6) generators from General Electric for emergency generation services, as well as auxiliary equipment for all 8 GE peaking units.

6. However, the installation of these units cannot begin without the prior removal of the existing units even though some are currently out of use.

7. To that effect and regarding the Unit Retirement Checklist, in December 2025, Genera provided an updated spreadsheet showing the expected decommissioning dates for the peaker units, allowing LUMA to review and approve them.

8. On January 26, 2026, a conditional approval of the Unit Retirement Checklist was issued by LUMA, but as part of the conditions Genera will have to enter into service the battery energy storage system to supply at least 76MW before starting the decommissioning of existing peaker units.

9. An additional requirement to meet before proceeding with the installation of the units is the environmental permits compliance. An amendment to the Non-PSD applicability requirement

was submitted to the Environmental Protection Agency on November 1, 2024, for the Jobos, Dagua and Yabucoa sites. A final determination is still pending. Once received, Genera will be able to begin construction.

10. An agreement with LUMA must be reached to use the existing interconnection points and therefore avoid delays in the project timeline. Genera continues working toward that goal.

11. Genera respectfully submits this Informative Motion on the status of Emergency Generation and Black-Start Generation system to demonstrate the advances in the project development and the commitment with the grid stabilization process.

WHEREFORE, Genera respectfully requests that the PREB take notice of the above, and accept Genera's Informative Motion on the status of Emergency Generation and Black-Start Generation system.

RESPECTFULLY SUBMITTED.

In San Juan, Puerto Rico, this 23rd day of February 2026.

It is hereby certified that this motion was filed using the electronic filing system of this Energy Bureau, and that electronic copies of this Motion will be notified to the following attorneys who have filed a notice of appearance in this case: **Lcda. Mirelis Valle Cancel**, mvalle@gmlex.net; **Lcda. María Teresa Bustelo-García**, mbustelo@gmlex.net.
