CASE NO. NEPR-MI-2019-0016

SUBJECT: LUMA's Motion Submitting and Substituting Interconnections Progress Report for October-December 2025

**MOTION SUBMITTING REVISED INTERCONNECTIONS PROGRESS REPORT
FOR OCTOBER–DECEMBER 2025 AND RELATED DOCUMENTS**

TO THE PUERTO RICO ENERGY BUREAU:

COME NOW, LUMA ENERGY, LLC as Management Co., and LUMA ENERGY SERVCO, LLC (collectively, "LUMA"), through the respective undersigned legal counsel and respectfully state and submit the following:

I. Introduction

Pursuant to the directives of the Puerto Rico Energy Bureau ("Energy Bureau"), LUMA respectfully submits this motion to correct and substitute certain exhibits previously filed with the Energy Bureau on February 13, 2026. This filing is made in compliance with the Energy Bureau's Resolutions and Orders, including those issued on July 21, 2020, May 7, 2021, April 4, 2024, and July 12, 2024. After submitting the Interconnections Progress Report for the quarter of October through December 2025, LUMA identified that certain information contained in Exhibits 2 and 3 required revision and correction, which in turn necessitates corresponding amendments to Exhibit 4. To ensure that the Energy Bureau evaluates the most accurate and precise data, and to facilitate review by the Energy Bureau, participants, and the public, LUMA is submitting revised and corrected versions of all four exhibits that entirely supersede those filed on February 13, 2026.

This submission is made in good faith, as soon as practicable after LUMA became aware that corrections were warranted, and with no intention of causing delays or undue burden.

II. Procedural Background

1. In compliance with multiple orders entered by the Energy Bureau in the captioned case, on February 13, 2026, LUMA submitted a document titled *Motion Submitting Interconnections Progress Report for October-December 2025 and Requesting Order for Continuance of Hearing* ("February 13 Motion").

2. With the February 13 Motion, LUMA submitted four exhibits, to wit:

- a. Exhibit 1 - the Interconnections Progress Report for the October through December 2025 quarter;
- b. Exhibit 2 - the Distributed Generation Systems Data File ("DG Data File");
- c. Exhibit 3 - the DG Data File divided by customer class, including residential, commercial, industrial, and agricultural; and
- d. Exhibit 4 - the visual presentation to be used in the upcoming compliance hearing.

3. In the February 13 Motion, LUMA requested that the Energy Bureau grant a continuance of the compliance hearing then scheduled to be held on February 23, 2026, to a later date between March 9-13, 2026. *See* February 13 Motion § IV.

4. On February 17, 2026, the Solar Energy Industries Association Corp. submitted a *Motion in Support of LUMA's Request for Continuance of Hearing* that, as the title indicates, supported LUMA's request for continuance as stated in the February 13 Motion.

5. That same day, the Energy Bureau granted LUMA's request for continuance. *See* Resolution and Order entered on February 17, 2026. The compliance hearing was continued to March 12, 2026.

III. Need for Revision and Substitution of Exhibits

6. On March 5, 2026, LUMA identified an inconsistency on slides 20-28 on Exhibit 4 where the accredited energy values appear higher than the energy exported. While this could occur within individual customer classes (residential, commercial, industrial, or agricultural), this variance should not occur consistently across all classes. Upon reviewing the underlying Excel report submitted as Exhibit 3 to the February 13 Motion, LUMA found that the formula used to calculate the “energy credited” metric for the last semester contained an error. Once the formula was corrected, the issue was resolved, and the results now align as expected.

7. To ensure that the Energy Bureau evaluates the most accurate and precise data, LUMA is hereby submitting revised versions of Exhibits 2, 3 and 4 with the corrected information.

8. Further, to ease review of the information and to promote efficiency, LUMA is submitting the entire set of documents originally presented with the February 13 Motion. This approach ensures that when the Energy Bureau, participants, and the public wish to refer to the documents, they can consult a single, complete, and accurate set of materials rather than reviewing multiple filings. Thus, LUMA is hereby submitting the following documents entirely correct and substitute those submitted with the February 13 Motion:

- a. Exhibit 1 - the Interconnections Progress Report for the October through December 2025 quarter;
- b. Exhibit 2 - the Distributed Generation Systems Data File ("DG Data File");

- c. Exhibit 3 - the DG Data File divided by customer class, including residential, commercial, industrial, and agricultural; and
- d. Exhibit 4 - the visual presentation (slides) to be used in the upcoming compliance hearing.

9. LUMA respectfully states that it is submitting these revisions as soon as practicable after it became aware that revisions and amendments were warranted. Further, LUMA states that this submission and request for substitution is made in good faith, to advance the purposes of these proceedings, and with no intention of causing delays or imposing undue burden on the Energy Bureau, participants, or the public.

IV. Conclusion

WHEREFORE, LUMA respectfully requests that the Energy Bureau:

- Take notice of the foregoing;
- Accept the revised and corrected Interconnections Progress Report for the October through December 2025 quarter, submitted as Exhibit 1;
- Accept the DG Data File, submitted as Exhibit 2;
- Accept the DG Data File divided by customer class, including residential, commercial, industrial, and agricultural, submitted as Exhibit 3; and
- Accept the revised and corrected visual presentation (slides) submitted as Exhibit 4; and
- Grant such other relief as may be just and proper.

RESPECTFULLY SUBMITTED.

In Guaynabo, Puerto Rico, this 6th day of March 2026.
