PUERTO RICO ENERGY BUREAU**

IN RE: INTERCONNECTION REGULATIONS

CASE NO.: NEPR-MI-2019-0009
CEPR-MI-2018-0008

SUBJECT: March 26, 2026 Resolution and Order on Smart Inverter Settings Workshop.

NUNC PRO TUNC

On March 26, 2026 the Energy Bureau of the Puerto Rico Public Service Regulatory Board (“Energy Bureau”) issued a Resolution and Order (“March 26 Order”) inviting all stakeholders, and any other persons or groups interested, to a Virtual Stakeholder Workshop scheduled for March 31, 2026 at 2:30 pm, where the national laboratories staff will present the study’s findings on the discussed Smart Inverter Settings Profiles (“Inverter Settings”), that could potentially benefit both distributed generators and the grid.

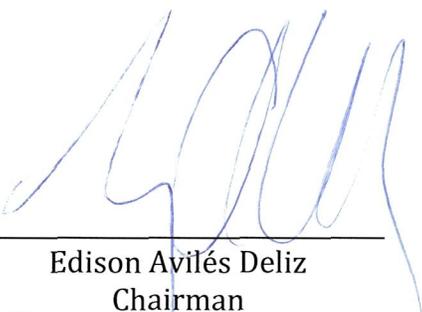

The Energy Bureau, inadvertently, mentioned the National Laboratory of the Rockies (formerly NREL) and the correct entity is **Sandia National Laboratories**, as the entity who conducted an independent study, with real-world data, regarding the voltage effects (on the grid, related to the power injection of distributed generators) and the possible modifications to the Inverter Settings that are currently in effect.

The Energy Bureau **CORRECTS** the March 26 Order to read as follows:

As part of the US Department of Energy’s support to the island of Puerto Rico, the **Sandia National Laboratories** conducted an independent study, with real-world data, regarding the voltage effects (on the grid, related to the power injection of distributed generators) and the possible modifications to the Inverter Settings that are currently in effect. In the interest of reaching a consensus between stakeholders regarding the modifications to said Inverter Settings, that could potentially benefit both distributed generators and the grid, the Energy Bureau deems it appropriate to discuss the study’s findings with all stakeholders.

Additionally, the Energy Bureau informs that any person interested in participating in the workshop may contact the Energy Bureau’s clerk office, through secretaria@jrsp.pr.gov and request access to the event.

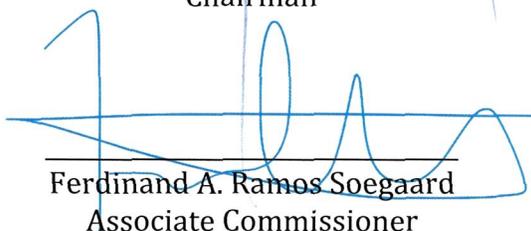

Be it notified and published.
