MOTION TO INFORM REGARDING PROGRESS ON SMART INVERTER SETTINGS

TO THE HONORABLE PUERTO RICO ENERGY BUREAU:

COMES NOW the Solar and Energy Storage Association of Puerto Rico (“SESA-PR”), which respectfully states and informs the Honorable Energy Bureau as follows:

1. By Resolution and Order of November 7, 2024, the Energy Bureau approved LUMA’s Technical Bulletin 2024-001 establishing Smart Inverter Settings effective January 1, 2025.
2. SESA expresses its sincere appreciation to the Honorable Energy Bureau for convening the technical workshop on this matter on March 31, 2026. The workshop provided a constructive forum for dialogue among stakeholders and meaningfully advanced the parties’ mutual understanding of the technical and policy issues now under discussion.
3. SESA informs that, in recent weeks, SESA and LUMA have held multiple meetings aimed at identifying points of agreement and mutual understanding on potential recommended near-term revisions to the currently required Smart Inverter Settings. These discussions have been substantive, technically focused, and constructive.
4. Based on the trajectory and substance of these meetings, SESA forecasts that a mutually agreed set of revisions to the Smart Inverter Settings, suitable for near-term implementation, will likely be finalized by late May or June 2026, and then presented to the Energy Bureau for review and approval.

WHEREFORE, SESA respectfully requests that the Honorable Energy Bureau **take notice** of the foregoing.

RESPECTFULLY SUBMITTED in San Juan, Puerto Rico, this 8th day of May, 2026.

PJ Wilson
Executive Director, SESA-PR
