

**GOVERNMENT OF PUERTO RICO
PUBLIC SERVICE REGULATORY BOARD
PUERTO RICO ENERGY BUREAU**

IN RE: REVIEW OF THE PUERTO RICO
ELECTRIC POWER AUTHORITY'S 10-YEAR
INFRASTRUCTURE PLAN – DECEMBER
2020

CASE NO.: NEPR-MI-2021-0002

SUBJECT: Resolution and Order for Motion
Submitting One (1) FEMA Approval of
Project.

RESOLUTION AND ORDER

I. Introduction

On July 28, 2026, LUMA¹ filed before the Energy Bureau of the Puerto Rico Public Service Regulatory Board ("Energy Bureau") a document titled *Motion Submitting One (1) FEMA Approval of Project, Request for Confidential Treatment, and Supporting Memorandum of Law* ("July 28 Motion"). Through the July 28 Motion, LUMA submitted FEMA's approval and obligation of the following T&D Project:

- FAAS^t [Pole and Conductor Repair – Arecibo Group 3 – Phase 2] (Distribution), Project No. 1066739.

The FEMA approval reflects a total eligible project amount of \$2,643,744.84, consisting of \$2,557,027.99 under Section 428 and \$86,716.85 under Section 406 Hazard Mitigation. The approved federal share is \$2,379,370.36, and the non-federal share is \$264,374.48. FEMA obligated the federal share on July 20, 2026.

The approved scope includes the replacement of poles and repair of conductors associated with five distribution feeders in the Arecibo region. The Section 406 hazard mitigation component provides for replacement of damaged poles with higher-rated poles designed to withstand winds of up to 160 miles per hour.

LUMA states that the Arecibo Group 3 – Phase 2 Project is included in the Consolidated Project List and submits the FEMA approval in compliance with the Energy Bureau's prior orders requiring LUMA to file copies of FEMA and/or COR3 approvals, including the obligated costs for each project.

II. Request for Confidential Treatment

In the July 28 Motion, LUMA requests confidential treatment for portions of Exhibit 1. LUMA states that the FEMA approval contains Critical Energy Infrastructure Information ("CEII"), including detailed information regarding specific energy infrastructure, facility locations, coordinates, and the configuration of distribution assets.

LUMA filed a redacted public version of Exhibit 1 and requested confidential treatment for the unredacted version pursuant to Section 6.15 of Act 57-2014², the Energy Bureau's Policy on Management of Confidential Information, and applicable federal authorities related to CEII, including 18 C.F.R. § 388.113 and 6 U.S.C. §§ 671-674.

LUMA identified the following portions of Exhibit 1 as containing confidential information:

- FAAS^t [Pole and Conductor Repair – Arecibo Group 3 – Phase 2] (Distribution): pages 1-2 and 9.

¹ LUMA Energy, LLC and LUMA Energy ServCo, LLC (jointly referred as "LUMA").

² Known as the *Puerto Rico Energy Transformation and RELIEF Act, as amended* ("Act 57-2014").

III. Evaluation and Analysis

The July 28 Motion does not request approval of a new scope of work. Rather, it submits FEMA’s approval and obligation of a project previously approved by the Energy Bureau and included in the Consolidated Project List. The filing therefore complies with the Energy Bureau’s prior directives requiring LUMA to submit evidence of FEMA and/or COR3 approvals and the corresponding obligated costs after such approvals are received.

The Energy Bureau finds that the FEMA approval submitted by LUMA identifies the approved scope, eligible project amount, Section 406 hazard mitigation component, federal and non-federal shares, and obligation date for the Arecibo Group 3 – Phase 2 Project. The Energy Bureau determines that LUMA has complied with the applicable reporting requirement for this project.

With respect to LUMA’s request for confidential treatment, Section 6.15 of Act 57-2014 authorizes the Energy Bureau to protect information submitted before it when, after evaluation, the Energy Bureau determines that the information merits confidential treatment. Upon review of LUMA’s request, the Energy Bureau determines that the identified portions of Exhibit 1 qualify as CEII because they contain detailed information regarding specific electric infrastructure, facility locations, coordinates, and system configuration that could compromise the security or resilience of critical electric infrastructure if publicly disclosed.

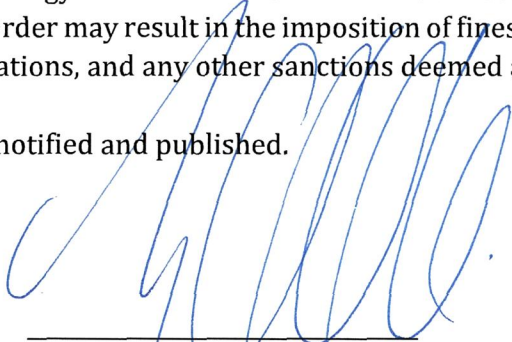

IV. Conclusion

The Energy Bureau **TAKES NOTICE** of and **ACCEPTS** the FEMA approval submitted by LUMA for the Arecibo Group 3 – Phase 2 Project, as a project previously approved by the Energy Bureau and included in the Consolidated Project List.

The Energy Bureau **GRANTS** LUMA’s request for confidential treatment of pages 1–2 and 9 of the unredacted version of Exhibit 1 as Critical Energy Infrastructure Information.

The Energy Bureau **WARNS** LUMA that noncompliance with any provision of this Resolution and Order may result in the imposition of fines under Act 57-2014, applicable Energy Bureau regulations, and any other sanctions deemed appropriate by the Energy Bureau.

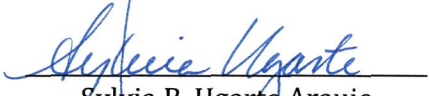

Be it notified and published.
