

**GOVERNMENT OF PUERTO RICO
PUERTO RICO PUBLIC SERVICE REGULATORY BOARD
PUERTO RICO ENERGY BUREAU**

IN RE: INTERCONNECTION REGULATIONS

CASE NO.: NEPR-MI-2019-0009
NEPR-MI-2018-0008

SUBJECT: Resolution and Order in response to Joint Motion Regarding the Sequencing of Approval of the Technical Interconnection Requirements

RESOLUTION AND ORDER

I. Introduction and Relevant Background

July 13, 2026, the Energy Bureau of the Puerto Rico Public Service Regulatory Board ("Energy Bureau") issued a Resolution and Order ("July 13 Resolution") containing a Draft Distributed Generation and Microgrid Interconnection Regulation ("Revised Preliminary Draft"). As part of the July 13 Resolution, the Energy Bureau ordered LUMA¹ to file a Revised Draft TIR² by August 11, 2026.

On July 27, 2026, the Solar and Energy Storage Association of Puerto Rico ("SESA"), LUMA, and the Independent Consumer Protection Office ("OIPC") (collectively, the "Joint Movants") filed a document titled *Joint Motion Regarding the Sequencing of Approval of the Technical Interconnection Requirements* ("July 27 Motion"). Through the July 27 Motion, the Joint Movants request that the Energy Bureau vacate the August 11, 2026 deadline for LUMA to file a Revised Draft TIR and provide that the TIR will only be approved after the Energy Bureau adopts the final Interconnection Regulation.

II. Discussion and Analysis

In the July 27 Motion, the Joint Movants assert that the Interconnection Regulation and the TIR are distinct instruments and as such, would benefit from being addressed sequentially.³ The Joint Movants, however, do not provide any additional support for this statement. While the Energy Bureau agrees that the TIR is a distinct document and will be informed, in part, by the Interconnection Regulation, this does not prohibit LUMA from initiating the process of updating the TIR and seeking stakeholder feedback. The Energy Bureau reminds LUMA that it initially prepared a draft Comprehensive TIR document for review and approval by the Energy Bureau prior to the approval of the Interconnection Regulation.

The Energy Bureau agrees with the Joint Movants that the TIR should be approved after the Interconnection Regulation; however, the TIR must be approved shortly thereafter. The technical requirements contained in the TIR such as codes, standards, and fees could be necessary to implement the Interconnection Regulation. The Energy Bureau appreciates that LUMA requires more time to update the TIR and incorporate stakeholder feedback. However, the Energy Bureau **WARNS** LUMA to not wait until the approval of the Interconnection Regulation to begin the process of updating the TIR.

Therefore, the Energy Bureau **ACCEPTS** the Joint Movants request to vacate the August 11, 2026 deadline for LUMA to file the Revised Draft TIR and **ORDERS** LUMA to submit a Comprehensive TIR document for review and approval within fifteen (15) days of the approval of the Interconnection Regulation to ensure its timely approval.

¹ LUMA Energy LLC and LUMA ServCo LLC ('jointly referred as "LUMA").

² Technical Interconnection Requirements ("TIR").

³ July 27 Motion, p. 1.

The Energy Bureau **REMINDS** the Joint Movants and all stakeholders that they shall submit comments on the Revised Preliminary Draft by August 14, 2026 in anticipation to the 2nd Stakeholder Workshop to be held on August 25, 2026 at 9:30am. The objective of these workshops (3rd Stakeholder Workshop is scheduled for September 21, 2026 at 9:30am) is to evaluate and address stakeholder comments and seek consensus to reach solutions that are aligned with public policy. There will be other drafts and opportunities to comment during the remainder of this proceeding.

III. Conclusion

Based on the findings cited in Section II of this Resolution and Order, the Energy Bureau determines the following:

- 1) The Energy Bureau **VACATES** the August 11, 2026 deadline for LUMA to file the Revised Draft TIR.
- 2) The Energy Bureau **ORDERS** LUMA to submit a Comprehensive TIR document for review and approval within fifteen (15) days of the approval of the Interconnection Regulation.
