IN RE: REVIEW OF GENERA PR, LLC
REQUEST TO OPERATE PALO SECO MP
AND MAYAGUEZ CT WITH NATURAL
GAS AS PRIMARY FUEL

Case No.: NEPR-MI-2024-0004

Subject: Informative Motion Regarding the Status of the Mayagüez Conversion Project and Request for Confidential Treatment of Exhibit A.

**INFORMATIVE MOTION REGARDING THE STATUS OF THE MAYAGÜEZ
CONVERSION PROJECT AND REQUEST FOR CONFIDENTIAL TREATMENT OF
EXHIBIT A**

TO THE HONORABLE PUERTO RICO ENERGY BUREAU:

COMES NOW GENERA PR LLC (“Genera”), as agent of the Puerto Rico Electric Power Authority (“PREPA”),¹ through its counsel of record, and respectfully submits and prays as follows:

1. On January 31, 2025, the Puerto Rico Energy Bureau (“Energy Bureau” or “PREB”) issued a *Resolution and Order* conditionally approving the conversion of the four combustion turbines at the Mayagüez Power Plant (“Mayagüez CTs”) to operate with natural gas as the primary fuel (the “Mayagüez Project”). *See January 31 Resolution*, pp. 15-16. Since then, the Energy Bureau has followed the progress of the Mayagüez Project, most recently through its *Resolution and Order* issued on July 20, 2026 (“July 20 Resolution”).

2. In its *Motion in Response to Resolution and Order Dated July 20, 2026*, filed on July 29, 2026 (“July 29 Motion”), Genera explained that it could not responsibly finalize an

¹Pursuant to the *Puerto Rico Thermal Generation Facilities Operation and Maintenance Agreement* (“LGA OMA”), dated January 24, 2023, executed by and among PREPA, the Puerto Rico Public-Private Partnerships Authority and Genera, Genera is the sole operator and administrator of the Legacy Generation Assets (as defined in the LGA OMA) and the sole entity authorized to represent PREPA before the Energy Bureau with respect to any matter related to the performance of any of the O&M Services (as defined in the LGA OMA) provided by Genera under the LGA OMA.

actionable scope of work for the Mayagüez Project without the technical requirements and logistical parameters of the natural gas supplier selected by the Third-Party Procurement Office (“3PPO”), Crowley LNG Puerto Rico, LLC (“Crowley”). *See July 29 Motion*, pp. 2 and 6.

3. Genera submits this *Informative Motion* to apprise the Energy Bureau that it has now received some of that information and to report on the steps it has taken since the *July 29 Motion*.

I. STATUS OF THE MAYAGÜEZ PROJECT

4. On August 3, 2026, Genera received a communication from the 3PPO requesting a visit to the Mayagüez facilities together with Crowley and proposing August 25, 2026 as the date for the visit.

5. On August 25, 2026, Crowley conducted the site visit to the Mayagüez facilities.

6. On that same date, Genera requested that the 3PPO obtain from Crowley the equipment specifications, design information, and logistics plans for the Mayagüez Project, so that Genera’s technical personnel could develop the Initial Scope of Work (“Initial SOW”) that must be submitted to the Energy Bureau and, after approved by the Energy Bureau, to the Federal Emergency Management Agency (“FEMA”).

7. On September 1, 2026, Genera received from the 3PPO a document titled “Response to Request for Information: Multiple Generation Sites (MULTI-SITE) 3PPO-1125-17-MSIN” (the “Crowley RFI Response”), which is included herewith as **Exhibit A** (Confidential). The Crowley RFI Response addresses, among other matters, the proposed LNG delivery logistics from Crowley’s LNG terminal facility in Peñuelas to the Mayagüez site, the proposed transportation method and delivery frequency, and recommended technical specifications for the onsite LNG storage and regasification equipment.

8. Notwithstanding there are some technical aspects still pending to be clarified with Crowley to ensure eligibility of FEMA funding, Genera's technical team has evaluated the Crowley RFI Response and is currently developing the Initial SOW. Genera anticipates submitting the Initial SOW to the Energy Bureau for its approval within the next ten (10) business days.

9. Genera will continue to keep the Energy Bureau informed of any further developments regarding the Mayagüez Project, and will raise any eligibility concerns that may be identified.

10. Furthermore, **Exhibit A** contains proprietary commercial and technical information belonging to Crowley, which was prepared in the context of an ongoing competitive procurement process. It also contains technical information regarding the design of fuel receiving, storage, and regasification infrastructure for a generation facility. Accordingly, pursuant to Section 6.15 of Act 57-2014, as amended, Section 1.15 of Regulation No. 8543, and the Energy Bureau's *Policy on Management of Confidential Information*, Genera submits **Exhibit A** under seal and respectfully requests that the Energy Bureau grant it confidential treatment and maintain it for the sole use of the Energy Bureau.

11. Genera will file a memorandum of law setting forth the legal basis for the confidential treatment of Exhibit A within ten (10) days from the filing of this motion.

WHEREFORE, Genera respectfully requests that the Energy Bureau: (i) **take notice** of the foregoing; and (ii) **grant** the request for confidential treatment to **Exhibit A**, pending the filing of the memorandum of law referenced herein.

RESPECTFULLY SUBMITTED.

In San Juan, Puerto Rico, this 23rd day of September 2026.
